

San Jacinto Community College District Technical Programs

At San Jacinto Community College District, students with specific career goals may earn Associate of Applied Science degrees as preparation for careers in a wide variety of technical fields, or they may earn technical certificates as preparation for entry level employment in the shortest time possible.

Credits earned in technical courses are generally not transferable to other colleges or to universities. Students should carefully study and follow the degree or certificate program requirements of whatever technical field they choose at the College.

Technical Programs

Major Codes	Technical Programs
3ACNT	Accounting A.A.S.
4ACNT	Accounting Certificate of Technology
6ACNT	Accounting Occupational Certificate
4AERO-DSP	Aeronautical Technology Aircraft Dispatcher Certificate of Technology
3AERO-MNT	Aeronautical Technology Aircraft Maintenance Management A.A.S.
3AERO-MGT	Aeronautical Technology Aviation Management A.A.S.
4AERO-PLT	Aeronautical Technology Career Pilot Certificate of Technology
3AERO-PDP	Aeronautical Technology Pilot Development Program A.A.S.
4AERO-PDP	Aeronautical Technology Pilot Development Program Certificate of Technology
3AIRC	Air Conditioning Technology A.A.S.
4AIRC	Air Conditioning Technology Certificate of Technology
4AIRC-COMM	Air Conditioning (Commercial and Industrial) Certificate of Technology
6AIRC	Air Conditioning (Residential) Technology Occupational Certificate
3ELECTACMPT	Applied Computer Electronics Technology A.A.S.
4ELECTACMPT	Applied Computer Electronics Technology Certificate of Technology
6ELTR-COMM	Applied Computer Electronics Communication Technology Occupational Certificate
6ELECTACMPT	Applied Computer Electronics Computer/Electronics Technician Occupational Certificate
6ABDR-PNT	Automotive Painting Occupational Certificate
6ABDR-BODY	Automotive Collision Repair Assistant Specialty Occupational Certificate
3ABDR-C	Automotive Collision Repair A.A.S.
4ABDR-C	Automotive Collision Repair Certificate of Technology
4ABDR-NC	Automotive Non-Collision Repair Certificate of Technology
3ABCR-MGT	Automotive Collision Repair Technology-Management Specialty A.A.S.
4ABCR-MGT	Automotive Collision Repair Technology-Management Specialty Certificate of Technology
3ART-COMM	Art-Commercial-A.A.S.
4ART-COMM	Art-Commercial Certificate of Technology
6ART-MMCA	Art-Commercial Multimedia/Animation-Occupational Certificate
3AUTO	Automotive Technology A.A.S.
3AUTO-AC	Automotive Technology-AC Delco A.A.S.
4AUTO-AC	Automotive Technology-AC Delco Certificate of Technology
4AUTO	Automotive Technology-Basic Certificate of Technology
3AUTO-C	Automotive Technology-Daimler Chrysler
3AUTO-F	Automotive Technology-Ford A.A.S.
4AUTO-F	Automotive Technology-Ford Maintenance and Light Repair Certificate of Technology
3AUTO-G	Automotive Technology-General Motors A.A.S.
3AUTO-H	Automotive Technology-Honda A.A.S.
4AUTO-H	Automotive Technology-Honda Certificate of Technology
4AUTO-HM	Automotive-Honda Maintenance and Light Repair Certificate of Technology
4AUTO-MCN	Automotive Technology-Machinist Certificate of Technology
4AUTO-MLR	Automotive Technology-Maintenance and Light Repair Certificate of Technology
3AUTO-T	Automotive Technology-Toyota A.A.S.
4AUTO-T	Automotive Technology-Toyota Certificate of Technology
4AUTO-UC	Automotive Technology-Certificate of Technology
4AUTO-UH	Automotive Tech-Under Hood Certificate of Technology
3BMGT-SUPR	Business Mgmt - Supervision A.A.S.
4BMGT-SUPR	Business Mgmt - Supervision Certificate of Technology
6BMGT-SUPR	Business Mgmt - Supervision Occupational Certificate
3BMGT-ENTR	Business Mgmt - Small Business Entrepreneur A.A.S.
4BMGT-SMBU	Business Mgmt - Small Business Entrepreneur Certificate of Technology
6BMGT-ECOM	Business Management - E Commerce Occupational Certificate
3BOFT-EXE	Business Office Technology-Executive/Administrative Assistant A.A.S.
4BOFT-E	Business Office Technology-Executive/Administrative Assistant Certificate of Technology
6BOFT-CL	Business Office Technology-General Office Clerk Occupational Certificate
3BOFT-LGL	Business Office Technology-Legal Secretary A.A.S.
4BOFT-L	Business Office Technology-Legal Secretary Certificate of Technology
3BOFT-M	Business Office Technology-Medical Administrative Assistant A.A.S.
4BOFT-M	Business Office Technology-Medical Administrative Assistant Certificate of Technology
4BOFT-SW	Business Software Specialist Certificate of Technology
6CHID-ADM	Child Care/Early Childhood Education Child Care Administrator's Credential Occupational Certificate
6CHID-DIR	Child Development/Early Childhood Education Associate Training for Director-Occupational Certificate

Major Codes	Technical Programs
7CHID-CUR	Child Development/Early Childhood Education Curriculum Specialist-
3CHID	Child Development/Early Childhood Education A.A.S.
4CHID	Child Development/Early Childhood Education Certificate of Technology
4CHID-TA	Child Development/Early Childhood Education-Teacher Aide Certificate of Technology
6CIS-ABDD	Computer Information Systems-Advanced Database Design-Occupational Certificate

4WLD-C	Welding Technology–Combination Welder Certificate of Technology

Associate of Applied Science Degree

All associate of applied science (A.A.S.) degrees have these requirements in common:

1. A minimum of 15 semester credit hours of general education courses. Courses that satisfy this requirement are listed in the Transfer Core Curriculum, unless otherwise indicated.
2. Basic skills in the use of computers.

Other requirements for the (A.A.S.) degree are dependent upon the particular technical program. The technical courses included in this degree are not designed to be transferable

Technical Programs

to senior institutions; however, some colleges may accept certain courses in transfer. Students should consult a College counselor or the chair of the department offering the program for information regarding possible transfer of technical courses.

The curricula for the Associate of Applied Science Degree programs are included in this section of the Catalog, listed alphabetically by major. For additional requirements for these degrees, students should refer to the section titled Awarding of Degrees and Certificates.

Technical Certificates

The College offers technical certificates as evidence that students have completed a certain set of technical courses designed to develop one or more skills related to a particular career field. Students may receive a certificate of technology, an occupational certificate, and/or a certificate of specialization.

For general requirements for each of these certificates, students should refer to the section titled Awarding of Degrees and Certificates. For specific course requirements for these certificates, students should refer to the particular technical program listed alphabetically by major in this section of the Catalog.

For additional information concerning technical certificates, students should consult a College counselor or speak with the chair of the department offering the certificate program.

Accounting

Accounting Associate of Applied Science Degree

All Campuses

The Accounting Associate of Applied Science Degree is an accelerated two-year accounting program for people preparing for immediate careers in accounting. Students pursuing a bachelor's degree in accounting should refer to the information about the associate of arts degree in the Transfer Programs section and see a counselor prior to registration.

Aeronautical Technology

Central Campus Only

All students must have the approval of the Aeronautical Department chair before enrolling in flight courses. Fees for flight courses will be in addition to normal college tuition and fees, and are subject to contractual and federal aviation regulation changes.

I) To be eligible for the A.A.S. degree, students will complete their flight courses through the College-approved flight contractor for College credit. The following exceptions: however, apply:

A) Students who have obtained a private, commercial, instrument and/or multi-engine rating prior to their first admission to the San Jacinto Community College District Pilot Program may apply for advanced placement testing and/or course substitution according to the following guidelines:

- 1) Up to 16 semester hours of credit may be awarded by advanced placement testing for the following courses: AIRP 1215, 1255, 1301, 1311, 1451, 2239, 2250, 2251, and 2337. Students must apply for and complete an advanced placement test before completion of the first term of enrollment in aviation courses.
- 2) In addition to receiving authorization for a maximum of 16 semester hours of advanced placement credit, students may petition the department chair for approval to take substitute courses for required courses in the curriculum for which they have earned certain certifications and/or ratings prior to entering San Jacinto Community College District. Substitute courses are listed below and are acceptable, with department chair approval, in specific options in which the course is not included as a requirement.
- 3) The following courses are acceptable in specific options in which the course is not included as a requirement:

ACCT 2301	ACCT 2302	AIRP 1341	AIRP 1345
AIRP 2242	AIRP 2243	AIRP 2251	AIRP 2331
AIRP 2333	AIRP 2336	AIRP 2352	AIRP 2353
AIRP 2357	AVIM 2335	AVIM 2337	AVIM 2339
BMGT 1301	BMGT 1303	BMGT 1313	CHEM 1411
CHEM 1412	DFTG 1405	DFTG 2417	ECON 2301
ECON 2302	ELPT 1311	ENGL 1302	HRPO 1311
HRPO 2301	ITSC 1301	ITSC 1305	ITSC 1309
ITSC 1310	ITSC 1318	ITSC 1329	ITSC 1331
MATH 1314	MATH 1316	MATH 1324	MATH 1325
MATH 2312	MATH 2318	MATH 2320	MATH 2413
MATH 2414	MATH 2415	MRKG 1311	PHYS 1401
SPAN 1411	SPAN 1412	SPAN 2311	SPAN 2312
MATH 1333			

4) All flight course requirements must be verified by an Aeronautical Department examination of the student's logbook.

B) Students who provide documentation of total flight hours accumulated prior to their admission to the San Jacinto Community College District Pilot Program, and who obtained this training at an FAR Part 141 certified school may apply to transfer up to one-half of those hours into the San Jacinto Community College District Pilot Program and to apply those hours toward flight course requirements.

C) Students who provide documentation of total flight hours accumulated prior to their first admission to the San Jacinto Community College District Pilot Program and who have obtained this training under an FAR Part 61, may apply to transfer up to one-fourth of those hours into the San Jacinto Community College District Pilot Program and to apply those hours toward flight course requirements.

II) Students may elect to contract directly with the College-approved flight contractor for flight instruction and pay the cost of that instruction to the contractor. Such students would petition the Aeronautical Department chair for approval to take other credit courses which would substitute for the required flight courses in the degree program. Students who choose this arrangement may not be eligible for College financial assistance.

III) The College may withdraw any student from a flight course for the following reasons:

A) Student's failure to conform to published FAA regulations.

B) Student's failure to conform to the flight contractor's College-approved course syllabus, and College-approved safety rules and regulations as published in the Flight Student Handbook.

C) Student's involvement in one or more FAA reportable accidents or incidents.

IV) The College may, upon the flight contractor's recommendation, refuse to enroll a student in a subsequent flight course.

V) A student who is denied enrollment in or is withdrawn from a flight course may appeal this decision by following the sequence specified for grade appeal in the SJC Student Handbook.

VI) Students may enroll in a maximum of two flight courses per registration period.

VII) Aviation students must maintain a grade point average of at least 2.0 in all aviation courses. Students enrolled in flight courses must earn a grade of C or above in order to progress to the next flight course.

Hazlewood Tuition Exemption (Section 54.203, Education Code)

The following conditions apply to students seeking exemption from payment of flight fees under the provisions of Section 54.203, Education Code.

A) Students eligible under the Hazlewood Act may be eligible for a partial Hazlewood exemption if the cost of registration exceeds the amount of V.A. Education Benefits received. (See V.A. Counselor in the Financial Aid Office for details.)

B) All flight courses are eligible for the Hazlewood exemption; however, a student may enroll in each flight course only one time under this exemption. Also, a student is limited to two flight courses per term.

Aircraft Dispatcher - Certificate of Technology

Central Campus Only

Students must be at least 22 1/2 years old to enroll in AIRP 2353

First Term	Credit
AIRP 1301—Air Navigation	3
AIRP 1307—Aviation Meteorology	3
AIRP 1311—Flight Theory	3
AIRP 1341—Advanced Air Navigation	3
AIRP 1451—Instrument Ground School	4

Second Term

Flight Instructor or Multi-Engine or
Instrument Flight Instructor or Multi-
Engine Flight Instructor written and
practical examinations.

Note: Optional courses which may be taken for the certificate of technology in lieu of AIRP 1215 and 1255: AIRP 2242, 2251, or 2243.

Aviation Management

Associate of Applied Science Degree

Central Campus Only

Aviation Management is a two-year program leading to an Associate of Applied Science Degree. The curriculum includes basic management and business courses, plus advanced courses directed toward the application of principles of management and marketing to aviation industry problems.

Graduates of this program may consider employment in airport and airline management, general aviation sales and services, or in a government agency serving aviation.

First Term	Credit

Aircraft Maintenance Management Speciality Associate of Applied Science Degree

Central Campus Only

San Jacinto Community College District recognizes the Federal Aviation Administration (FAA) Certification for Airframe and Powerplant Technician as the equivalent of 30 semester hours of college course work. In addition to this FAA certification, 41 semester credit hours (as specified in the Aircraft Maintenance Management Option curriculum) are required for the degree. Students who expect to receive VA educational benefits must have their FAA certification in Airframe and Powerplant prior to enrolling in the program.

Pilot Development Program (PDP) Associate of Applied Science Degree

Central Campus Only

The PDP is an ongoing effort of the College and the Delta Connection Academy to address the need for quality-trained airline pilots.

The objective of this program is to prepare a student with no prior flight experience for an entry-level position as first officer with a regional airline. Each student is carefully tracked and evaluated in the areas of knowledge, attitude, aptitude, and flying skills. Graduates will be given an opportunity to teach for the Delta Connection Academy. Successful students may be given interviews for a first officer position with one of the Delta Connection Academy approved FAA Part 121 air carriers, including Continental Express.

After graduates receive a hiring offer, they will receive additional flight training to further prepare them for a successful career as an airline pilot.

For additional information see the Aeronautical Department chair.

Capstone Experience: **Federal Aviation Administration, Private, Commercial and Instrument written and practical examinations.**

* Remedial courses (those courses beginning with 0) do not apply toward the associate degree.

** Courses which satisfy this requirement are listed in the Humanities and Visual/Performing Arts and Behavioral and Social Sciences sections of the Transfer Core Curriculum.

- AIRP 1215—requires 19 hours of Flight Trainer laboratory.
- AIRP 1255—requires 7 hours of Flight Trainer laboratory.
- AIRP 2239—requires 16 hours of Flight Trainer laboratory.
- AIRP 2250—requires 24 hours of Flight Trainer laboratory.
- AIRP 2251—requires 8 hours of Flight Trainer laboratory.

Notes:

- Hours indicated for flight courses are flying hours and do not reflect the hours of oral instruction.
- A combination of AIRP 1301, 1307, and 1311 prepares students to take the FAA Private Pilot written examination.
- The completion of AIRP 2337 prepares students to take the FAA Commercial Pilot written examination.
- The completion of AIRP 1451 prepares the student to take the FAA Instrument Pilot written examination.

Air Conditioning Technology

Air Conditioning Technology

Associate of Applied Science Degree

North and South Campuses Only

The Air Conditioning Technology program is designed to provide students with the entry-level skills necessary required for employment as technicians in residential and light commercial air conditioning, refrigeration, and heating.

A graduate of this program will have a good foundation in the principles of air conditioning, refrigeration, and heating, with main emphasis on troubleshooting and service. Related topics of energy conservation, air systems analysis, and air conditioning codes are also thoroughly covered.

Automotive Technology

Automotive Technology Associate of Applied Science Degree

Central Campus Only

The Automotive Technology Program is designed to prepare its graduates to enter the rapidly changing automotive repair industry. Students will study each automobile system, where they will learn the theory of operation, along with the proper diagnostic procedure to repair a system problem. Each course will have a laboratory session where each student will have an opportunity to practice the concepts and procedures studied in the classroom.

Students are required to furnish a prescribed hand tool set and be prepared to upgrade the required tools as the program progresses. All tuition, fees and textbook costs are the responsibility of the student.

Under Hood Certificate of Technology Total	25
Capstone Experience: National A.S.E. Certification Exams	

* Students enrolling in the Automotive Technician Trainee–Under Hood Certificate of Technology program may choose to specialize with a Honda emphasis in approved courses (AUMT 1405, AUMT 1407, AUMT 1419, AUMT 2417, AUMT 2455, and AUMT 1445). Students completing all approved courses with a Honda emphasis will receive a certificate of technology.

Automotive Machinist Certificate of Technology

Central Campus Only

Students enrolled in the Automotive Machinist Certificate of Technology Program receive training that prepares them for employment in area machine shops. Students study the skills necessary to perform machining and repair operations to small and large internal combustion power plants, including gasoline and diesel applications. Students working toward this certificate are restricted to taking only those courses listed in the outline below. Upon completion of the required courses, students are eligible to participate in

graduation exercises with degree students. If students decide to continue their education, the courses may then be applied toward an Associate of Applied Science Degree.

AC Delco

Technical Service Educational Program (TSEP) Associate of Applied Science Degree

Central Campus Only

Program Not offered After Fall 2006 (200710)

The AC Delco Technical Service Educational Program is a two-year automotive program designed to update the technical competence and professional level of the technician. The curriculum has been co-designed by AC Delco and San Jacinto Community College District to lead to an Associate of Applied Science Degree in Automotive Technology. The program requires students to work at AC Delco TSS repair facilities as well as attend San Jacinto Community College District classroom lectures and laboratory classes, where they will work on donated training vehicles.

Each student must furnish a prescribed basic hand-tool set and be prepared to upgrade required tools as the program progresses. All tuition, fees, and textbook costs are the responsibility of the student. Interested students should contact the College Automotive Technology Department for an information packet. Registration for beginning students is limited to the fall term of each year.

Program Criteria

All candidates registering for the program at San Jacinto Community College District must apply in the Automotive Department Office and be approved by the Automotive Department chair. The following are basic criteria for acceptance:

1. Students must be sponsored by an AC Delco dealership.
2. Students must maintain sponsorship of the AC Delco dealership to avoid being withdrawn from AC Delco TSEP classes.

3. Students unable to adhere to the AC Delco TSEP degree plan will be placed on departmental probation.
4. Students placed on departmental probation are required to meet with the Automotive Department chair prior to registering for the next term. Students will submit an action plan to the Automotive Department chair identifying course deficiencies during the following term(s). The department chair must approve all Actions.
5. Students failing to enroll in and successfully complete the classes submitted in the approved action plan will be withdrawn from AC Delco TSEP classes.
6. Students enrolled in AC Delco TSEP must have a valid driver's license and be insurable.
7. Students enrolled in AC Delco TSEP must wear a dealer-provided uniform when working at the dealership and when attending AC Delco TSEP classes.

College Automotive Program (CAP)

DaimlerChrysler

Associate of Applied Science

Central Campus Only

The DaimlerChrysler College Automotive Program is a two-year automotive program designed to update the technical and professional level of the incoming dealership technician. The curriculum has been co-designed by DaimlerChrysler and San Jacinto Community College District to lead to an Associate of Applied Science Degree in Automotive Technology. The program requires students to work at a DaimlerChrysler dealership (Chrysler, Dodge, Jeep) as well as attend San Jacinto Community College District classroom and laboratory classes where they will work on DaimlerChrysler products.

Each student must furnish a prescribed set of hand tools and be prepared to upgrade required tools as the program progresses. All tuition, fees, and textbook costs are the responsibility of the student. Interested students should visit www.sanjac.edu/central/auto_tech/ and fill out the electronic application or contact the Automotive Technology Department. Registration for classes is limited to the fall term each year.

Program Criteria

All candidates registering for the DaimlerChrysler CAP program at San Jacinto Community College District must apply electronically at www.sanjac.edu/central/auto_tech/ or contact the Automotive Technology Department in order to be added to the prospective student list and be approved by the Automotive Department Chair.

1. Students who are not sponsored by a Chrysler, Dodge or Jeep dealership will not be allowed to register.
2. Students must have a reading, writing and math skill level of 7-7-7 by the start of the program. Candidates not meeting the 7-7-7 skill level will require special action plans and advisement by the Automotive Department Chair.
3. Students must maintain sponsorship of the DaimlerChrysler dealership to avoid being withdrawn from the DaimlerChrysler CAP classes.
4. Students unable to adhere to the DaimlerChrysler CAP degree plan will be put on departmental probation.
5. Students put on departmental probation are required to meet with the Automotive Department Chair to discuss an action plan prior to registering for the next semester.

Students will submit an action plan to the Automotive Programs Manager identifying course deficiencies and a strategy for correcting these deficiencies during the following term(s). The Programs Manager must approve all action plans.

6. Students failing to enroll in and successfully complete classes submitted in the approved action plan will be withdrawn from DaimlerChrysler CAP classes.
7. Students enrolled in DaimlerChrysler classes must have a valid driver's license and be insurable.
8. Students enrolled in DaimlerChrysler CAP must wear the dealer-provided uniform and be neatly groomed when working at the dealership and when attending all college classes.

Note: Students enrolling in this certificate must pass the Mechanical Aptitude Test and pass an interview with the lead Toyota/Lexus instructor.

Business Management

All Campuses

Business Management is a two-year supervisory training program that combines classroom management theory with practical on-the-job training. The program leads to the Associate of Applied Science Degree in Business Management. The Business Management curriculum includes courses designed to provide a practical, comprehensive program covering certain managerial activities. The program is designed to meet the needs of people preparing for careers in business and industry such as retailing, wholesaling, in-

dustrial management, small business, and human resources. The Business Management Program supports the theory that there is no substitute for world-of-work experience in the learning process. Management course work includes studies in basic principles of management, human relations, group dynamics, motivation of individuals and groups, leadership development, organization of work and people, study of supervisory functions, and many other management interests, including international business and trade.

A Contemporary Approach to Management Training

Concurrent with the Business Management courses, the Supervision major or the Small Business Entrepreneur major is required to take a practicum which coordinates job training with classroom theory. One of the requirements of the practicum course is that a student work a minimum of 20 hours per week at a training station approved by a Business Management coordinator. Designed as a development tool, the practicum requires that the Business Management coordinator, the employer, and the student agree on a tentative training outline or personal development plan which, according to specific guidelines, must improve, enhance, and demonstrate personal and professional managerial skills of the student at work.

Note: Students taking the practicum courses should be counseled by a Business Management coordinator or the department chair prior to registration. BMGT 2368 can be taken more than once for credit; consequently, the credit for this course, when taken more than once, may be applied toward the certificate of technology and toward the degree. This practicum helps the student receive practical training and experience compatible with his or her management career objective.

Supervision Option

Associate of Applied Science Degree

All Campuses

The Associate of Applied Science Degree in Business Management is an accelerated two-year supervisory training program for people preparing for careers in business management. Students pursuing a bachelor's degree should see a counselor or the Business Department chair or associate dean prior to registration.

Technical Programs

International Business and Trade Associate of Applied Science Degree

North Campus Only

The International Business and Trade Program is designed to prepare students for careers in the international trade community. Graduates will work as specialists in importing and exporting, as administrative service managers, as sales supervisors, as wholesale and retail buyers, as purchasing agents, as importing and exporting trade compliance officers, as transportation supervisors and as wholesale representatives. Students successfully completing the program will develop a strong background in import and export management processes, governmental controls, licensing of products, import and export documentation, customs regulations, and political-legal factors in the foreign trade environment. Topics also include international purchasing and sourcing; international marketing strategies; international monetary systems and financial institutions; international and domestic transportation; cross-cultural management and communication processes and cultural geographic distinctions that affect individual, group, and organizational behavior.

Child Development/Early Childhood Education

Child Development/Early Childhood Education University Transfer Plan Associate of Art Degree

Central and North Campuses

An associate of arts degree is available for students working toward a baccalaureate degree with teacher certification for Early Childhood Education (EC–4th grade, effective September, 2002). See the Child Development Department chair or a counselor for more information.

Students who will pursue a four-year degree at a college or university should enroll in the Associate of Arts (A.A.) degree plan for a maximum of transferable credit. All students considering transfer should consult with a counselor regarding the specific requirements of various universities for this major.

Child Development/Early Childhood Education Associate of Applied Science Degree

This curriculum is designed to develop basic skills, attitudes and competencies necessary for personnel to provide high-quality care and early education in preschools and childcare centers.

Child Development/Early Childhood Education Child Care Administrator's Credential Occupational Certificates

Central and North Campuses

The Child Care Administrator's Credential Program has been designed to provide educational training for persons interested in teaching young children and/or directing childcare centers. Upon successful completion of the 19-20 semester credit hours, the student will be awarded a credential approved by the Texas Department of Protective and Regulatory Services. To renew the Child Care Administrator's Credential, a student must complete an additional child development course three years after originally completing.

Required Courses	Credit

Child Development/Early Childhood Education Marketable Achiever Certificates

Central and North Campuses

For students who have completed the Administrator's Credential Program, San Jacinto Community College District provides opportunity for additional professional development in two areas of specialization: Curriculum Specialist, and/or Parent/Child Specialist, which may be obtained after completion of the Administrator's Credential Program. Each specialization requires completion of four courses. Application for these certificates should be made in the department office. The clusters of courses for the specializations are:

Curriculum Specialist Marketable Achiever Certificate

- TECA 1318—Wellness of the Young Child or
 - CDEC 1318—Wellness of the Young Child or
 - TECA 1311—Educating Young Children or
 - CDEC 1311—Educating Young Children
- CDEC 1356—Emergent Literacy for Early Childhood
- CDEC 2341—The School Age Child
- CDEC 1413—Curriculum Resources for Early Childhood Programs

Parent/Child Specialist Marketable Achiever Certificate

- FMLD 1353—Marriage and Family Issues
- TECA 1303—Family, School and Community or
 - CDEC 1303—Family, School and Community
- CDEC 1321—The Infant and Toddler or
 - CDEC 1359—Children with Special Needs
- FMLD 1372—Dynamics of Human Relationships

Child Development/Early Childhood Education Child Development Associate Training (CDA)

Central and North Campuses

This certificate is designed to prepare childcare personnel for the Child Development Associate National Credential (CDA). The curriculum follows the six competency areas established by the Council for Early Childhood Recognition. A certificate of training will be awarded upon successful completion of the courses listed.

Fall Term

CDEC 1417—Child Development Associate Training I	4
CDEC 2164—Practicum In Child Development.....	1
CDEC 2422—Child Development Associate Training II.....	4
CDEC 2165—Practicum in Child Development.....	1

Computer Information Systems

All Campuses

The Computer Information Systems Program is designed primarily for students seeking an occupational certificate, or certificate of technology or an associate of applied science (A.A.S.) degree. It is recommended that students complete the 18-credit hour Core Information Technology occupational certificate curriculum before continuing into a certificate of technology or associate of applied science degree program. The classes in the Core Information Technology occupational certificate plan will apply toward most of the other CIS certificates and A.A.S. degrees.

The CIS curriculum is designed to provide the student with an understanding of the principles of CIS, experience with techniques of IT and competence in the application of CIS. The College offers a core set of computer information courses leading to an occupational certificate. The occupational certificate courses form a basis for programs leading a certificate of technology and/or an associate of applied science degree in Applications Programming, Web Applications Development, Computer support, Network Administration Specialties (CISCO and Microsoft), Information Technology Security, or Database Design.

Several degree specialties are available. The Applications Programming Specialty emphasizes computer information systems and the use of computer languages in the solution of business and scientific problems. The Computer Support Specialty emphasizes the setup and use of microcomputers in computer information systems. The Network Administration Specialties (CISCO and Microsoft), emphasizes the design, implementation and administration of local and wide-area networks. Web Application Development addresses the design and development of web pages for use on the World Wide Web. Gaming Design and Development focuses on learning basic skills which will assist students in the development of software for computer graphics, multimedia, and games. Database Design emphasizes sound database design, implementation and support, methods for large database systems.

Note to Transfer Students:

Due to variations in requirements at 4-year colleges and universities, a student desiring to pursue a bachelor's degree in Computer Science is strongly advised to consult a CIS department chair at San Jacinto Community College District and at the institution to which they wish to transfer to review the appropriate transfer degree plans to the designated university. The computer science classes located elsewhere in the San Jacinto Community College District Catalog may also be appropriate.

Network Administration - CISCO

All Campuses

The following curriculum is designed to provide the student with the skills needed to work as a CISCO network technician. Emphasis is placed upon the installation and maintenance of networks in business and industry. The graduate will be able to administer and troubleshoot CISCO networking equipment and networking infrastructure. Beginning and advanced occupational certificates, a certificate of technology, and an Associate of Applied Science degree are available. Common job titles for graduates include network technician, CISCO service representative, technical support specialist, and network system administrator. The CISCO courses can lead to the certifications of Certified CISCO Network Associate (CCNA), Certified CISCO Network Professional (CCNP), and Camptia Net+.

Capstone Experience: Texas Department of Licensing and Regulations Hair Weaving/Braiding Specialist Exam

Criminal Justice

Associate of Arts Degree University Transfer Plan

Central and North Campuses Only

Students who will pursue a four-year degree at a university should enroll in the associate of arts (A.A.) degree plan for a maximum of transferable credit. The A.A. is a 62-credit hour program, which may include the following courses in the major:

Criminal Justice (15 semester hours)

CRIJ 1301	CRIJ 1306	CRIJ 1310	CRIJ 2313
CRIJ 2328	Approved Electives (6 semester hours)		
Approved Electives			
CRIJ 1307	CRIJ 1313	CRIJ 2314	CRIJ 2323
CRIJ 2301			

All students considering transfer should consult with a counselor regarding the specific requirements of various universities for this major.

Law Enforcement Option

Associate of Applied Science Degree

The Criminal Justice Department at San Jacinto Community College District has voluntarily implemented the POTAAC agreement to articulate 13 hours of college credit for licensed peace officers in Texas that meet the following qualifications:

1. Successfully completed an approved 560-hour law enforcement training program.
2. Successfully passed the Texas Commission on Law Enforcement Officers Standards and Education (TCLEOSE) licensing exam after 1983.
3. Successfully completed six (6) semester hours of criminal justice at San Jacinto Community College District.

Interested and qualified students should contact the department chair prior to enrollment.

Central and North Campuses

The Law Enforcement Option is for those students planning careers in criminal law, federal, state or local law enforcement, and for other students interested in learning about the operation of the criminal justice system.

Academic Peace Officer Licensure Option Certificate of Technology

Central and North Campuses Only (Not offered after Spring 2006)

This option is for students who plan a career as a Texas Law Enforcement Officer and who wish to sit for the state licensing exam based on their college career paths. Students must have a completed associates degree prior to the issuance of a letter of eligibility to sit for the State's license exam. Therefore, students should have a completed or near completed associates degree before entering the Texas Peace Officer Sequencing Courses. Interested and qualified students should contact the department chair for evaluation.

Dietary Manager

Central Campus Only

The 448-hour certificate is designed to prepare students to become dietary managers by meeting the requirements of the Dietary Managers Association. Students entering the program should be employed in a food service position and have the approval and participation of a registered dietitian as preceptor. Students who complete the program will receive a certificate from San Jacinto Community College District and will be eligible to sit for the certification exam and for membership in the Dietary Managers Association.

Upon successful completion of the two-term program, the student will be qualified to work under the guidance of a

Technical Programs

registered dietitian to participate in providing food management or nutrition care services.

Spring Term

DITA 1400–Dietary Manager I and co-requisite
FDNS 1168–Practicum–Dietetics/Human Nutritional Services

Fall Term

DITA 1401–Dietary Manager II and co-requisite
FDNS 1168–Practicum–Dietetics/Human Nutritional Services

School Food Service Study

Central Campus Only

This certificate is planned to train food service personnel employed by schools, hospitals and similar institutions. The curriculum meets the standards set by the Texas School Food Service Association for school personnel training and certification.

IFWA 1318–Nutrition for the Food Service Professional or
HECO 1322–Principles of Nutrition (Unit 2)
RSTO 1313–Hospitality Supervision (Unit 5)
CHEF 1313–Food Service Operation/Systems (Unit 4)
CHEF 1401–Basic Food Preparation (Unit 1)
RSTO 2405–Management of Food Production and Service (Unit 3)

Food Service Specialty

Central Campus Only

These certificates are designed to meet the requirements of the Texas School Food Service Association levels of certification.

Food Service Level I

CHEF 1305–Sanitation and Safety

Food Service Level II

CHEF 1401–Basic Food Preparation
RSTO 2405–Management of Food Production and Service
RSTO 1313–Hospitality Supervision

Food Service Level III

IFWA 1305–Food Service Equipment and Planning
RSTO 1325–Purchasing for Hospitality Operations
RSTO 1317–Nutrition for the Food Service Professional

Food Service Level IV

CHEF 1313–Food Service Operation/Systems
FDNS 1309–Nutrition in the Community
RSTO 2301–Principles of Food and Beverage Controls
PSTR 1401–Fundamentals of Baking or
PSTR 2431–Advanced Pastry Shop

CHEF 2402–Saucier or
IFWA 2441–Specialized Food Preparation

Note: Students completing the above 4 levels will also be eligible to apply for the Certificate of Technology in Dietetics/Food Service Management.

Dietetic Technician Nutrition Care Associate of Applied Science Degree

Note: This program will no longer accept new students beginning Fall 2007. For questions please contact the program director at 281-476-1501 ext 1498.

Central Campus Only

The Dietetic Technician Associate of Applied Science degree is designed to provide students with the necessary knowledge, skills, and abilities to become qualified practitioners at the technician level in the area of dietetics. Program graduates should be able to effectively assist a registered dietitian in providing food service and nutrition care to individuals and groups in the community. The Dietetic Technician Program at San Jacinto Community College District is currently granted developmental accreditation by the Commission on Accreditation of Dietetics Education of The American Dietetic Association, 216 W. Jackson Blvd., Chicago, IL 60606-6995, 312-899-4876. Students graduating from an approved program are eligible for membership in The American Dietetic Association, and to take the registration examination to become a Dietetic Technician Registered (DTR).

Emergency Medical Technology

A criminal background check and/or drug screening is required of all Health Science students attending clinical courses, or practicum; and may be required prior to admission to the program.

The Emergency Medical Technology (EMT) curriculum includes a combination of class lectures, skills training and clinical training in hospital and ambulance settings. The EMT Program at San Jacinto Community College District meets Texas Department of State Health Services (TDSHS) and the National Registry of EMTs. Students registering for the Emergency Medical Technology Program must be potentially eligible to attempt the National Registry of EMS's certification examination upon successful completion of the program. Any applicant convicted of a felony and/or misdemeanor offense may or may not be eligible for clinical participation and/or state certification.

Central and North Campuses

Programs are accredited by the Texas Department of State Health Services EMS and Trauma Systems, the Commission on Accreditation of Allied Health Education Programs (CAAHEP), and the Committee on Accreditation of Educational Programs for the EMS Professions (CoAEMSP).

Students must meet departmental standards to take the National Registry certification examination. A fee is charged by the TDSHS and the National Registry of EMT's for certification examinations. There may also be additional charges for field experiences.

The EMT Program is designed for persons seeking positions in the emergency health care field, such as ambulance personnel, safety engineers, industrial nurses, rescue squad workers, childcare personnel, policemen, and firemen, as well as anyone who supervises or is responsible for the safety and well being of a number of people.

Philosophy

The philosophy of the Department of Emergency Medical Technology adheres to the philosophy of the San Jacinto Community College District. Emergency medical technicians and paramedics provide pre-hospital emergency medical care, rescue, and transportation of the sick and injured.

EMS education is a lifetime process of increasing knowledge and skills appropriate to the ever growing and changing field of emergency medicine. It is the responsibility of the faculty to design and implement the educational experiences needed for a student to establish the knowledge and job entry-level skills to practice pre-hospital emergency care and crisis intervention.

The Department of Emergency Medical Technology adheres to the curricula set forth by the U.S. Department of Transportation, the Texas Department of State Health Services, the American Heart Association, the International Trauma Life Support Association and the American Academy of Pediatrics. Components of the curriculum include anatomical and physiological functions and dysfunctions, treatment modalities, rescue, management, advanced cardiovascular life support, international trauma life support, pediatric advance life support, pediatric education for pre-hospital providers, and ethical-legal responsibilities.

The associate of applied science, certificate of technology and occupational certificate programs require successful completion of the Emergency Medical Technology version of the VNSG 1320–Anatomy and Physiology for Allied Health. However, those students planning to pursue a bachelors degree and those planning to transition to other health sciences are advised to complete BIOL 2401 and BIOL 2402 (Anatomy and Physiology I and II), or to seek the advice of counselors or program advisors about the applicability and transferability of VNSG 1320, BIOL 2401 and BIOL 2402.

Computer literacy requirements for the associate of applied science degree require successful completion of ITSC 1309–Integrated Software Applications I. However, students planning ultimately to pursue a bachelor's degree are advised to take the BCIS 1305–Business Computer Applications or to seek the advice of counselors or program advisors about the applicability and transferability of ITSC 1309.

Objectives

Upon completion of the program, the emergency medical technology student should be able to:

1. Demonstrate the knowledge base and skills necessary for pre-hospital emergency medical care and patient management.
2. Demonstrate accepted characteristics of professionalism and compassionate patient management.
3. Utilize accepted knowledge and skills principles to provide emergency medical care in the pre-hospital setting.
4. Utilize communication skills to establish and maintain effective interpersonal relationships in the realm of emergency medical care.
5. Assume responsibility for continuing education to maintain professional competency and to meet state and national certification requirements.
6. Function in the capacity of an emergency medical team leader.

7. Participate as a member of the emergency medical services community in providing pre-hospital care, EMS system development, and education.
8. Successfully pass the National Registry of EMTs registry examination for certification in the field of emergency medical services, as required for certification in the state of Texas.

Program Information

1. Students registering for the Emergency Medical Technology Program must be potentially eligible to write the National Registry of EMTs certification exam upon successful completion of the program. An applicant convicted of a felony and/or misdemeanor offense may not be eligible for state certification.
2. Students must be 18 years of age or older to be eligible to receive certification from the Texas Department of State Health Services. Students younger than 18 years of age should contact the EMT Department prior to registration.
3. Students must have a high school diploma or GED certificate to be eligible to receive certification from the Texas Department of State Health Services.
4. Each EMSP student is required to pay the cost of the Texas Department of State Health Services and National Registry application fees and/or any associated fees directly to the Texas Department of State Health Services or National Registry of EMTs.
5. Each EMSP student who registers for an EMSP clinical or practicum course (EMSP 1160, 1260, 2161, 2162, 2168) will be required to purchase appropriate clinical attire and equipment.
6. Each student who registers for an EMSP clinical or practicum course (EMSP 1160, 1260, 2161, 2162, 2168) will be charged an insurance fee each term for malpractice liability insurance. It is strongly recommended that students have personal health insurance if enrolled in the above courses.
7. A prescribed physical examination may be required for some clinical and ambulance rotations, based on affiliation agreements. In those cases, proof of the physical examination must be on file in the EMSP Office prior to attending those rotations.
8. All students enrolled in health-related courses must show proof of one dose of vaccine administered on or after their first birthday or serological confirmation of immunity to measles/mumps/ rubella. Vaccines for tetanus/diphtheria are required every ten years after the dose obtained on or after the fourth birthday. Students must present proof of

having taken a tuberculosis skin test in the past 12 months, demonstrating to be free of TB. Students must also declare to have had chickenpox previously or must have received a Varicella vaccination. Other immunizations may also be required by some clinical sites. Proof of current immunizations must be on file in the EMSP Office prior to attending clinical or internship rotations.

9. Clinical site and time assignments are made at the discretion of the College and its affiliates and are subject to change without notice.
10. Each student is required to present proof of current CPR certification for health professionals from either the American Red Cross or the American Heart Association to complete EMSP 1160, 1260, 1305, 1338, 1355, 1356, 2161, 2162, 2168, 2243, 2330, 2348, and 2444. CPR training is included in the EMSP 1501 course.

Engineering Design Graphics

Engineering Design Graphics Associate of Applied Science Degree

All Campuses

Engineering Design Graphics is a highly technical field where engineering data is communicated through the use of computer sciences, mathematics, technical language, and modern sociological environments. Contemporary engineering designers are employed in diverse and specialized disciplines of engineering graphics such as 3D technical animation, 3D solid modeling, architecture, electronics, topographic, mechanical, structural and piping.

The Engineering Design Graphics Department provides academic and occupational skills training for design drafters, engineering students and technicians, and design animator/modelers using proven traditional instructional methods as well as emerging technologies such as 3D technical animation and 3D solid modeling.

In a world that is ever expanding, every commercially developed product began as a detailed drawing. These detailed drawings originated from developmental sketches, design specifications and data supplied by product engineers or other technically skilled experts. Within the Houston metropolitan area, design drafters routinely specialize in disciplines such as piping, mechanical, architectural, electrical, structural and topographic. Rapidly growing fields of study include 3D technical animation and 3D solid modeling. Design drafters prepare construction documents that illustrate design features, detailed dimensions, and specifications used in the manufacture, fabrication, and installation of every product we use.

The Engineering Design Graphics core curriculum features mechanical drawing, manual and computer-aided drafting courses, and mathematics. The balance of the curriculum includes courses in oral and written communication skills, behavioral or social sciences, physical education, and the humanities.

Based on high corporate demand for design drafters with discipline-specific skills, a student may choose to concentrate their efforts in a specialized field of study. A Specialty A.A.S. and/or Certificate of Technology is available in one of four areas, Architectural/Civil/Structural, Mechanical, Petro/Industrial, and Technical Animation and Modeling. Each curriculum is designed to provide training to employed design drafters wishing to upgrade their skills. Those seeking to upgrade their skills in a particular field of study may wish to obtain a Certificate of Specialization. This departmental certification requires only four to five classes concentrating in disciplines such as 3D Solid Modeling and Design, 3D Technical Animation and Rendering, Architectural, Civil, Electrical, Instrumentation, Mechanical, Piping or Structural 3D technical animation and 3D solid modeling are revolutionizing the design and presentation phases of product development. The Engineering Design Graphics Department is at the forefront in training for these new areas as well.

Fire Protection Technology

Central Campus Only

The Fire Protection Technology Department of San Jacinto Community College District offers three different educational programs for aspiring firefighters and current firefighters.

1. For aspiring firefighters, the College offers the Firefighter Training Academy. The academy meets and exceeds all state requirements for paid/career firefighters. Students seeking an entry-level firefighter position should begin here. See below for further information regarding the Firefighter Training Academy.
2. For academy graduates and current firefighters, the College offers an associate of applied science degree in firefighting. This program provides additional fire related education and certification opportunities as well as courses in general education.
3. For academy graduates and current firefighters who wish to become paramedics, the College offers a Paramedic Option for the Firefighting Associate of Applied Science Degree.

Students in the Fire Protection Technology Program must be potentially eligible to participate in certification examinations for firefighters upon successful completion of the prescribed course work. An applicant who has been convicted of a felony, implicated in substance abuse, or involved in activities considered inappropriate by the Texas Commission on Fire Protection may be ineligible to participate in the certification examination. Such an applicant should contact the Texas Commission on Fire Protection in Austin, Texas, for guidance in petitioning the Commission for a decision of eligibility. A copy of the Commission's statement of eligibility should be submitted to San Jacinto Community College District's Fire Protection Technology chief training officer.

Firefighter Training Academy

Central Campus Only

The following courses meet and exceed the Texas Commission on Fire Protection's curriculum requirements for Basic Fire Suppression Certification and the Texas Department of State Health Services's curricula requirements for Emergency Medical Technician–Basic certification.

FIRS 1301–Firefighter Certification I.....	3
FIRS 1407–Firefighter Certification II.....	4
FIRS 1313–Firefighter Certification III.....	3
FIRS 1319–Firefighter Certification IV.....	3
FIRS 1423–Firefighter Certification V.....	4
FIRS 1329–Firefighter Certification VI.....	3
FIRS 1433–Firefighter Certification VII.....	4
EMSP 1501–Emergency Medical Technician	5
EMSP 1160–Clinical EMT–Basic	1
PHED Activity	1
PHED Activity	1

Firefighter Training Academy Total 32

Academy Information

1. New academy classes begin each summer and fall semester. Please contact the Fire Protection Technology Office for specific schedules and registration information. It is suggested that students contact the Fire Protection Technology Office a term in advance of anticipated enrollment, as classes fill quickly.
2. Firefighter Training Academy cadets must undergo a medical examination and physical performance test as defined in NFPA 1582 and submit approval documentation to the department's chief training officer. Students not completing or failing the medical examination or the physical performance test are not eligible to continue in the academy and will be withdrawn. Students failing the medical examination or the physical performance test will be eligible for a 100% refund in accordance with the current refund policy if officially withdrawn in the Registrar's Office on or before the 12th class day.
3. Firefighter Training Academy students must earn a grade of C or better in each of the academy courses in order to graduate from the academy. Failure to earn a grade of C or better in any course in the academy will result in the student being administratively withdrawn from all Firefighter Training Academy courses.
4. Each Firefighter Training Academy cadet must satisfactorily demonstrate each of the required performance skills in the curriculum manual of the Texas Fire Commission on Fire Protection in order to graduate from the Basic Fire Academy.
5. Student-initiated withdrawals from the required physical education courses, or instructor-initiated withdrawals due to excessive absences shall result in administrative withdrawal from the Firefighter Training Academy.
6. In order to complete the Firefighter Training Academy, the student must earn a grade of C or above in each of the required physical education co-requisites. Failure to earn a grade of C or above in each of the required physical education co-requisites shall result in administrative withdrawal from the Firefighter Training Academy.
7. Administrative withdrawal from any San Jacinto Community College District course due to disciplinary action shall result in administrative withdrawal from the Firefighter Training Academy.

Certification Information

San Jacinto Community College District fire protection courses fulfill the educational requirements for numerous fire service certifications. Please contact the Fire Protection Technology Department on the Central Campus for specific information.

Firefighting

Associate of Applied Science Degree

Central Campus Only

Persons who are currently certified by the Texas Commission on Fire Protection may enter the program with special permission from the department chair. Under this provision, Firefighter–Basic Certification is accepted in lieu of completion of the following Fire Protection courses:

FIRS 1301	FIRS 1313	FIRS 1319	FIRS 1329
FIRS 1407	FIRS 1423	FIRS 1433	

Persons who are currently certified as Emergency Medical Technician–Basic by the Texas Department of State Health Services may enter the program with special permission from the department chair. Under this provision, Texas Department of State Health Services certification is accepted in lieu of completion of the Emergency Medical Technician–Basic courses specified in the program (EMSP 1501 and EMSP 1160).

Prospective students must satisfy the general admission requirements of the College and provide satisfactory evidence of basic firefighter certification to the Fire Protection Technology department chair and the registrar.

Geographic Information Science (GIS)

Geographic Information Science (GIS) Associate of Applied Science Degree

Central Campus Only

The Geographic Information Science program is designed for entry into the emergent technology of GIS. Using several industry-specific software programs, students will learn the acquisition, processing and merging of data, and the application of GIS for modeling and analysis. Classroom learning, fieldwork, and work experience will prepare the student with not only the technical skill but also the ability to analyze geographic data that will be in demand in the diverse employment market.

Geomatic Surveying Technology (Land Surveying)

Geomatic Surveying Technology Associate of Applied Science Degree

South Campus Only

Texas Senate Bill No. 545 (Professional Land Surveying Act) requires that, starting January 2003, all individuals who apply for certification as a surveyor-in-training to become a professional land surveyor must have earned an associate degree in surveying conferred by an accredited institution of higher education or must have earned an associate degree and acquired 32 semester credit hours in land surveying and/or related courses approved by the Texas Board of Professional Land Surveying. To qualify as a registered professional land surveyor and take the land surveyor examination requires a bachelor's degree (in any field) and two years training as a surveyor-in-training.

The curricula leading to an associate of applied science degree or certificate of technology are designed in coordination with professionals in the field to provide basic preparation for entry into the land surveying profession.

Gerontology Services

The Gerontology Services Program is designed to prepare students for careers in the field of aging. Due to a tremendous shift in the human experience, individuals are living longer with much healthier lifestyles. The Gerontology Services Program addresses issues of aging and the study of human growth and development. The older population is the largest consumer of health care services and presents great social challenges. These individuals are an increasingly diverse group with high expectations of health care providers. This new focus on healthcare for the elderly calls for the delivery of specialty programs developed within the context of a multidisciplinary approach.

The Gerontology Services Program courses provide students with an opportunity for education relative to the social, psychological, health, and wellness aspects of an aging population. Both the Associate of Applied Science Degree and the certificate of gerontology programs are designed to provide educational opportunities for those individuals who are interested in working directly, or indirectly, with the elderly population. The courses are designed to assist individuals to perform a variety of functions, including identifying the physical, mental and emotional changes that occur as a result of aging and to distinguish between healthy persons and aging persons with infirmities.

Health Information Management

Health Information Management Associate of Applied Science Degree

North Campus Only

The associate degree program is designed to train health information management personnel to perform a variety of technical functions including organizing, analyzing, coding, and technically evaluating health information. Health information technicians work to ensure that complete and accurate records are kept for each patient in a health care facility. The program is accredited by the Commission on Accreditation for Health Information and Information Management (CAHIIM) in cooperation with the Council on Accreditation of the American Health Information Management Association. Students are eligible to apply to write the national exam for the RHIT after completion of the A.A.S. degree.

Courses indicated by (*) are also offered via Distance Learning (Internet)

Instrumentation Technology

Instrumentation Technology Associate of Applied Science Degree

Central Campus Only

Instrumentation Technology training at San Jacinto Community College District falls into three categories: instrumentation installation, general instrument maintenance, and control systems technology. Our program is designed so that a student can achieve success in all three of these areas.

Instrumentation technology is arguably the most technologically challenging field in industry today. Highly trained instrument technicians, also known as a control systems technologists, are responsible for installing, calibrating, and troubleshooting individual process instruments, as well as complete control systems. They are expected to understand the workings of a process, as well as the complexity of the control system.

Computer control in the processing industry provides a platform for more sophisticated control strategies, and requires connecting intelligent devices together through various networking systems and protocols. Therefore, today's control systems technologist must be able to navigate among various intelligent devices and implement sophisticated control strategies if they are to be successful in troubleshooting control system problems. Our program addresses these issues in one of the most comprehensive industrial computer control labs in the country.

Key facilities of the Instrumentation Technology Program at San Jacinto Community College District are a fully equipped pneumatic control lab and an analog electronic lab control. We also have a ten-station SLC 5/03 Programmable Logic Controller (PLC) lab and a ten-station Emerson Process Management DeltaV Distributed Control System (DCS) lab with ten fully operational flowing process instrumented stations. In addition, we have access to a full-sized functioning distillation (ethylene glycol and water separation) unit to explore maintenance issues and control strategies.

Recently we started a new day program where a student can complete all of the classes necessary to earn a certificate of technology in two semesters.

Our primary focus is in providing the local processing industry with good, trainable entry-level technicians. However, our students will have the latitude of working in other related areas such as oil exploration and production, and municipal water treatment facilities for cross-country

pipeline companies, and electrical power plants, and in manufacturer field technician positions.

Interior Design

Interior Design Associate of Applied Science Degree

Central Campus Only

This program is designed to develop the ability to identify, research, and creatively solve problems relative to interior spaces, including programming, design analysis, and space planning. The students will work with commercial and residential interiors, prepare presentations, and learn business procedures used by interior designers.

Training includes six terms of study in interior design and related courses. However, a student may file for an associate of applied science degree after successful completion of the first two years of the program. Students may continue their study to complete the 18 term hours in the third year of the program and receive a certificate of technology, the professional credential in interior design. This credential qualifies the graduate to enter the profession of interior design as a beginning professional. The curriculum provides a balance of technical, creative, and business training necessary for a career in interior design. An applicant for interior design registration by examination who begins their education after September 1, 2006, must graduate from a program approved by FIDER.

Medical Imaging Technology

Medical Radiography Associate of Applied Science Degree

Central Campus Only

A criminal background check and/or drug screening is required of all Health Science students attending clinical courses, or practicum; and may be required prior to admission to the program.

Mission Statement: The mission and purpose of the Medical Imaging Department is to educate and train students for entry level employment in radiography, computed tomography and magnetic resonance imaging.

Upon graduation the student will:

- be proficient in areas of patient care, aseptic technique, and infection control;
- demonstrate communication skills, employ medical ethics, and show an understanding of medicolegal issues;
- properly operate radiographic equipment to produce images of diagnostic quality;
- demonstrate proper radiation protection skills;
- evaluate images or radiographs for diagnostic quality;
- locate pertinent anatomy and pathology on images or radiographs;
- perform standard radiographic positions and projections leading to completion of radiographic examinations;
- use reasoning and judgment to adapt the standard methods of radiographic exams upon evaluation of patient condition; and
- be familiar with special radiographic procedures and other types of medical imaging to include sonography, magnetic resonance imaging, mammography, and computed tomography, as well as explain the general indications for use of each.

The program is accredited by the Joint Review Committee on Education in Radiologic Technology. Upon completion of the program the student is granted an associate of applied science degree and is eligible to apply for certification examination given by the American Registry of Radiologic Technologists (ARRT) in diagnostic medical radiography.

The program curriculum is a balance of general educational and technical courses, as well as supervised clinical practicum work at local hospitals. This combination provides the student an opportunity for educational development and skill competency during the 24-month program.

Prior to entering the Radiography Program, students may take any of the general liberal arts courses required in the Program. Medical Radiography students must earn a grade of C or above in each Medical Radiography (RADR) course and maintain an overall grade point average of at least 2.0 in order to graduate from the Medical Radiography program.

If a student earns a grade of D, W, or F in a medical imaging (RADR) course, the student will not be permitted to continue or to graduate from the program until that course has been repeated and a grade of C or above has been earned. Students earning grades of less than a C in 3 RADR courses will be suspended from the program.

Students who do not enroll in the Medical Radiography program for one or more semesters after beginning the program must make written petition to the Medical Imaging department chair for re-entry into the program.

Because clinical space is limited, students are admitted on a competitive basis. Those seeking admission should first apply to San Jacinto Community College District and gain acceptance to the College. The Medical Radiography Program holds pre-enrollment meetings throughout the year for those interested in the program. For dates and times of these pre-enrollment meetings, you can call the Medical Imaging Department at 281.476.1871. Attendance at a pre-enrollment meeting is required to be able to apply to the program. Program admission criteria and the selection process are explained at the pre-enrollment information meeting.

Program Admission Criteria

Applicants must meet the College's general admission requirements, as well as the program admission criteria. After acceptance into the program, an applicant must have a physical examination by a licensed physician (M.D., D.O.) and an orientation with a member of the Department of Medical Imaging.

Students who apply for admission to the Medical Radiography Program will be selected on the basis of their highest ACT/SAT test scores or their highest grade point average at San Jacinto Community College District, dependent upon the option under which they apply (Option A or Option B following).

Option A: SAT score of 680 or above on a test taken prior to April 1995 or a score of 810 or above on an SAT taken on or after April 1, 1995; or an ACT composite score of 18 or above (ACT composite score of 15 or above if taken before October 1989).

Option B: Applicants must complete at San Jacinto Community College District nine semester hours as specified below with no grade lower than C.

- ITSC 1309 or Speech, or
- ENGL 1301 or Humanities/Visual or Performing Arts, or
- MATH 1314 or MATH 1333

Applicants seeking admission by Option B may petition the admission coordinator to take a more advanced mathematics or English course if they have completed the above stated courses with a grade of C or above at another accredited institution.

Students must apply for admission to the Department of Medical Imaging by submitting an application and all required official documents to the Office of Enrollment Services at San Jacinto Community College District Central. ACT and/or SAT scores will be requested by the department as well.

Applicants to the Medical Radiography Program will be notified by mail regarding their acceptance. Applicants who are not selected for admission to the Medical Radiography Program must reapply to be considered in the future. Applicants who are accepted for admission into the Medical Radiography Program, but who do not enroll, must also reapply.

Degree Planning for Registered Medical Radiographer (ARRT)

This degree program is provided as a means for registered medical radiographers to earn an associate of applied science degree from San Jacinto Community College District in Medical Radiography.

The student candidates must be graduates of an American Medical Association and Committee on Allied Health Education and Accreditation (CAHEA) approved program of medical radiography and must be registered by The American Registry of Radiologic Technologists (ARRT). Candidates must present a notarized copy of their current ARRT certificate to the department chair before registering for the required courses.

In addition to being currently certified by The American Registry of Radiologic Technologists (ARRT), the student must complete 28 semester hours of academic course work and 12 semester hours of Medical Radiography (RADR) course work as specified below in order to be eligible to receive the Associate of Applied Science Degree in Medical Radiography.

- MATH 1333—Contemporary Mathematics for Technical Programs
- ENGL 1301—Composition I
- *Humanities or Fine Arts
- PSYC 2301—General Psychology
- SPCH—Any three-semester hour speech course
- ITSC 1309—Integrated Software Applications I
- PHED Activity—two semester hours
- RADR 2309—Radiographic Imaging Equipment
- RADR 2333—Advanced Medical Imaging
- RADR 2213—Radiation Biologic Effects and Protection

All other requirements for the associate of applied science degree must be met as specified in the associate of applied science degree section of this Catalog.

** Courses which satisfy this requirement are listed in the Humanities and Visual/Performing Arts section of the Transfer Core Curriculum.*

Medical Laboratory Technology

Medical Laboratory Technology Associate of Applied Science Degree

Central Campus Only

A criminal background check and/or drug screening is required on all Health Science students attending clinical courses, or practicum; and may be required prior to admission to the program.

The Medical Laboratory Technology Program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS), 8410 W. Bryn Mawr Ave., Suite 670, Chicago, Illinois, 60631, 773.714.8880. Upon completion of the program, the student is granted an associate of applied science degree and is eligible to apply for the certification examination given by the Board of Registry of the American Society of Clinical Pathologists and/or the National Certification Agency for Medical Laboratory Personnel.

The program curriculum is a balance of general educational and technical courses, as well as supervised practicum work at area hospitals. This provides the student an opportunity for educational development, as well as skill competency.

Prior to entering the Medical Laboratory Technology Program, students may take any of the general liberal arts courses required in the Medical Laboratory Technology Program.

Medical Laboratory Technology students must earn a grade of C or above in each Medical Laboratory Technology course and required science courses, and maintain an overall grade point average of at least 2.0 in order to graduate from the Medical Laboratory Technology Program.

If a student earns a grade of D, W, or F in a Medical Laboratory Technology or science course, the student will be required to repeat the course in which the unsatisfactory grade was earned and pass that course with a grade of C or better in order to progress.

Clinical practicum absences must be made up within the term in which they occur.

Because clinical practicum space is limited, students are admitted on a competitive basis. Applicants or those seeking

additional information should contact the associate dean or a representative from the Department of Clinical Laboratory Science. Applications for admission to the fall term class are accepted beginning in January.

Students are required to purchase uniforms and accessories. Each student is responsible for his/her own transportation to the clinical areas. Each student who registers for Medical Laboratory Technology is required to purchase student liability insurance the term he/she starts the clinical laboratory practicum.

Philosophy

The philosophy of the Department of Clinical Laboratory Science (CLS) parallels the philosophy of San Jacinto Community College District. Medical laboratory technology is that allied health care field which performs laboratory test procedures and analyses used in the diagnosis, treatment, and prognosis of disease, as well as the maintenance of health. Medical laboratory technicians practice their specialty under the direction of licensed physicians in various settings which include hospitals, private and public health clinics, and industrial laboratories.

The medical laboratory technician must be able to apply the knowledge acquired through academic studies and student labs to the clinical setting so that meaningful test results will be obtained to report to the patient's physician. Graduates of the Medical Laboratory Technology Program will be prepared to practice medical laboratory technology in all major areas of the clinical laboratory as contributing members of the health care team.

Program Admission Criteria

Students who apply for admission to the Program of Medical Laboratory Technology (MLT) will be selected on the basis of their highest ACT/SAT test scores or their highest grade point average at San Jacinto Community College District, dependent upon the option under which they apply (Option A or Option B following).

Option A: SAT score of 680 or above on test taken prior to April 1995 or a score of 810 or above on an SAT taken on or after April 1, 1995; or an ACT composite score of 18 or above (ACT composite score of 15 or above if taken before October 1989).

Option B: Applicants must complete at San Jacinto Community College District ten semester hours as specified below with no grade lower than C.

- BIOL 2401 and
- ENGL 1301 and
- MATH 1314 or MATH 1333

Technical Programs

Applicants seeking admission by Option B may petition the admission coordinator to take a more advanced biology, mathematics or English course if they have completed the above stated courses with a grade of C or above at another accredited institution.

Students must apply for admission to the Program of Medical Laboratory Technology by submitting a formal application and all required official documents to the Office of Enrollment Services.

Applicants to the Medical Laboratory Technology Program will be notified by mail regarding their program admission status. Applicants who are not selected for admission to the Medical Laboratory Technology Program must reapply before the next term. Applicants who are accepted for admission to the Medical Laboratory Technology Program, but who do not enroll, must reapply. Applicants must meet the College's general admission requirements as well as the program admission criteria.

After acceptance into the program, an applicant must have a physical examination by a licensed physician (M.D., D.O.) and an orientation with a member of the Department of Clinical Laboratory Science.

Students are required to purchase uniforms and accessories.

Music

Recording Option

Associate of Applied Science Degree

Central Campus Only

The Audio Engineering curriculum is designed for students seeking careers as sound recording or sound reinforcement engineers. Employment opportunities exist in recording studios, television and radio stations, convention centers, hotels, churches and other private entities. The training places a heavy emphasis on the theory and hands-on application of recording, mixing, and effects-processing equipment. Also required are musical proficiency and an understanding of business and music business systems.

See Welding for related courses

Non-Destructive Testing Technology Associate of Applied Science Degree

Central Campus Only

This program is designed to offer students entry-level skills in quality assurance/quality control of welded and metal products. Students may make this degree relevant to such industries as petrochemical construction and/or maintenance, nuclear construction, machining and metal working, underwater construction technologies, and aviation maintenance. Training in this program conforms to the American Society of Non-Destructive Testing Guidelines, SNT-TC-1A.

Non-Destructive Testing Technology Certificate of Technology

Central Campus Only

Students pursuing the non-destructive testing courses can earn the technical training necessary to begin working in the inspection field. San Jacinto Community College District offers the required classroom training in the basic five methods of MT, PT, VT, UT, and ET, required by the American Society of Non-Destructive Testing Society guidelines, SMT-TC-1A. Training in these areas prepare students for entry-level work in either conventional non-destructive testing careers or as additional knowledge for current inspectors or fabricators.

Nursing

A criminal background check and/or drug screening is required on all Health Science students attending clinical courses, or practicum; and may be required prior to admission to the program.

San Jacinto Community College District offers three associate of applied science degree programs in Nursing. The generic (basic) RN program is offered on the Central Campus. Central Campus also offers the Transition to RN

program for LVN and Paramedic applicants. The South Campus offers the LVN/Paramedic to ADN Mobility degree for LVN and Paramedic applicants. Successful completion of course work in either of these programs qualifies students to make application for the National Council Licensure Examination–Registered Nurse (NCLEX–RN).

In addition to the associate degree nursing programs, the North and South campuses offer Vocational Nursing Programs. Successful completion of course work in this program qualifies students to make application to the Texas Board of Nurse Examiners to take the State Board Examination for Licensed Vocational Nurse.

Associate Degree Nursing (RN) Associate of Applied Science Degree

Central Campus Only

San Jacinto Community College District offers the Associate of Applied Science Degree Program in Nursing for selected candidates.

The associate degree nurse is prepared to practice within the discipline of nursing, using the nursing process and assuming legal, ethical, and professional accountability identified in the Nursing Practice Act. The graduate recognizes personal assets, potentials, limitations, and the responsibility for continued professional development. Practice of the graduate is at a beginning level in structured health care settings as manager and provider of care.

Completion of the prescribed courses qualifies students to make application for the National Council Licensure Examination–Registered Nurse (NCLEX–RN) required for all registered nurse candidates. A license to practice as a registered nurse (RN) is granted by the state to those graduates who pass this examination.

Nursing students receive their most of their education on the College campus where they share learning experiences with other College students.

Experience in patient care is gained in area hospitals and other health agencies. Professional nursing faculty provide instruction and supervision of students' clinical experience in area health care facilities. The clinical experience is concurrent with theory courses in general and professional education.

The primary purpose of this type of curriculum is to help the student develop as an individual and as a responsible citizen, who will become a competent practitioner in professional nursing.

The Secured Computerized Exit Test is administered upon completion of the nursing curriculum.

The program is accredited by the Texas Board of Nurse Examiners and the National League for Nursing Accrediting Commission (NLNAC), National League for Nursing Accrediting Commission, 61 Broadway–33rd floor, New York, NY 10006.

Program Admission Criteria

Applicants must meet the College's general admission requirements, as well as the program's admission criteria, and must be assessed for college readiness in the areas of reading, mathematics, and writing to be considered for acceptance into the RN program (See the Texas Success Initiative section of this catalog). Candidates must apply during one of the application periods stated below. Selection for admissions to the Associate Degree Nursing program is competitive. Applicants to the Generic (basic) RN program are chosen based on performance in option A or B and overall academic performance. Applicants to the Transition to RN program (LVN and Paramedic applicants) are chosen based on overall academic performance and interview.

A student on current academic probation is ineligible to apply to the nursing program.

The department chair must interview students who have been on academic probation at any time prior to their applying for admission to the nursing program. Also, the students' admission must be approved by the Nursing Admission Review Committee.

Option A: SAT score of 680 or above on a test taken prior to April 1995 or a score of 810 or above on an SAT taken on or after April 1, 1995; or an ACT composite score of 18 or above (ACT composite score of 15 or above if taken before October 1989). A minimum cumulative GPA of 2.0 is required for all students who have previously attended college.

Option B: Applicants must complete at San Jacinto Community College District 10 semester hours as specified below with at least a B average on the three courses and no grade lower than C.

- BIOL 2401 or BIOL 2402, BIOL 2420 or BIOL 2421, and
- ENGL 1301, and
- MATH 1314 or MATH 1333

Applicants seeking admission by Option B may petition the director of admissions to take a more advanced biology, mathematics, or English course if they have completed the above stated courses with a grade of C or above at another accredited institution.

Students must apply for admission to the Associate Degree Nursing Program by submitting a formal application and all required official documents to the Office of Enrollment Services during the application periods stated below.

Application Periods

- April 1 through June 1
- September 1 through November 1

Students seeking admission to the Associate Degree Nursing Program who have previously earned more than one grade of D or F in a nursing or a required biology course may not be eligible for admission to the Associate Degree Nursing Program. An ADN Admissions Review Committee composed of nursing faculty will review transcripts that indicate such grades, and the committee's decision regarding admission into the program will be final.

Applicants to the Associate Degree Nursing Program will be notified by mail regarding their program admission status. Applicants who are not selected for admission to the Associate Degree Nursing Program must reapply during the next application period. Applicants who are accepted for admission into the nursing program, but who do not enroll, must also reapply.

The acceptance letter to the nursing program will include application and fee information for the criminal background check and drug screening required prior to admission to the program.

Program Information

1. All college transcripts must be submitted by applicants and evaluated by the Enrollment Services Office. Students desiring to transfer nursing course credits must also submit transcripts to the Nursing Department chair. In order to be considered for transfer, the course credit must have been earned within two years prior to the term the student enrolls in the San Jacinto Community College Associate Degree Nursing Program, and the grade earned in the course must be a C or better. The student may be required to submit additional course material in order to determine the course's equivalency to the required nursing course in the Associate Degree Nursing Program. Theory and skill proficiency performances may be required.
2. Credit earned in a required biology course can be applied to the Associate of Science Degree in Nursing only when the credit was earned within the past five years and the grade earned was a C or better. Credit earned in a required biology course exceeds the five-year stipulation if the credit was earned five or more years prior to the term in which the student enrolls in the first nursing course.

- Credit earned in a required biology course that exceeds the five-year stipulation may be applicable if it is determined by the admission coordinator to be equivalent to the required biology course and if the student takes and scores a 70 or above on a proficiency examination.
3. An applicant to the nursing program must be potentially eligible to write the licensure exam for registered nurses upon successful completion of the program. The applicant who has been convicted of a felony, implicated in substance abuse, or involved in activities considered inappropriate by the Board of Nurse Examiners for the State of Texas is not eligible to apply to enter the Associate Degree Nursing Program until he/she has received a declaratory order from the Board of Nurse Examiners granting permission to write the NCLEX–RN. Such an applicant should contact the Executive Secretary of the Board of Nurse Examiners for guidance in petitioning the Board for a decision of eligibility prior to applying for entry into the nursing program. The Board’s statement of eligibility must be submitted to the Associate Degree Nursing Department chair.
 4. A student on current academic probation is ineligible to enroll in the nursing program.
 5. Prior to being admitted into the nursing program, students may take any of the academic courses required in the nursing program and must maintain a 2.0 GPA or better.
 6. All prospective nursing students must have earned credit in BIOL 2401 or BIOL 2402, BIOL 2420 or BIOL 2421, and ENGL 1301, and MATH 1333 or MATH 1314 prior to enrolling in the nursing program.
 7. A grade of C or better must be earned in all nursing and required biology courses. A student who fails to earn a grade of C or greater in a stated prerequisite nursing course must repeat the course and earn a C or greater prior to enrolling in the course with the stated prerequisite.
 8. Selected applicants must attend program orientation with the department chair.
 9. Selected applicants must submit proof of the following to the Nursing Department:
 - A. Physical exam
 - B. Purchase of school uniform and accessories.
 - C. Current CPR certification for health professionals
 - D. Liability insurance (paid during registration).
 - E. The Vocational Nurse applicant must show proof of a current Texas license to practice Vocational Nursing. The Paramedic applicant must show a current Paramedic Certificate.
 10. Each nursing student is required to pay for and take computerized external tests.
 11. Clinical site and time assignments are made at the discretion of the College and its affiliates, and are subject to change without notice.
 12. Students must earn a minimum grade of C in theory and corresponding clinical nursing courses before progressing to the next nursing course.
 13. The student must earn a grade of C or above in all nursing courses and maintain an overall grade point average of at least 2.0 in order to continue in the nursing program.

If a student earns a grade of D or F in a nursing course, or a required biology course, the student will be placed on departmental probation. (Should this grade of D or F be earned in a course that meets only the first eight weeks of a term, the student will be placed on departmental probation at the end of the first eight weeks of that term.) The student must demonstrate an effort to correct circumstances that contributed to the lack of success in the failed nursing or required biology course.

If the student subsequently earns a grade of D or F in a nursing or course, even though the student may have repeated the course in which the first grade of D or F was earned and received a minimum grade of C, the student will be dismissed from the nursing program and will be placed on indefinite program suspension.

In a nursing course that meets only the first eight weeks of the term, the student will be dismissed from the nursing program at the end of the first eight weeks of the term and will be administratively withdrawn from all nursing courses.

Should the student earn a grade of D or F in more than one required nursing course or required biology course during the same term, the probationary period will be waived and the student will be dismissed from the nursing program immediately and placed on indefinite program suspension.
 14. The Nursing Department encourages students to maintain continuity in the nursing program. Students electing to withdraw must meet with the Nursing Department chair for counseling prior to withdrawing.

Students who elect to withdraw from nursing studies in good academic standing will be permitted to return to the nursing program on a space-available basis. Such students will be given priority for available space.

Students electing to withdraw from a nursing course due to poor academic standing or unsafe clinical performance will receive a "W with Failing Course Average" report. These reports have the same consequences as a failed

nursing course. The first "W with Failing Course Average" report places the student on Department Probation; a subsequent "W with Failing Course Average" report suspends the student from the nursing program. These program status changes will be kept in the students' files located in the nursing department.

A student who withdraws from a nursing or required biology course must meet with the Nursing Department chair for advisement in order to enroll in the following term. The student must make written petition and meet with the Nursing Department chair at least 45 days prior to the term of re-entry. To be readmitted to the nursing program, the student must satisfy the criteria specified by the Nursing Department re-entry policy.

15. Credit earned in a nursing course can be applied toward the Associate of Applied Science Degree in Nursing only when the credit was earned within the past two years, and the grade earned was a C or better. Credit earned in a nursing course exceeds the two-year stipulation if the credit was earned two or more years prior to the term in which the student enrolls or reenrolls in the nursing program.

16. A student not enrolled in a nursing course for one or more terms for any reason must make written petition for readmission. Consideration for readmission will be on an individual basis and as space permits. Such students must abide by the requirements for readmission as outlined in the Nursing Department re-entry policy.

Students seeking re-entry to the Associate Degree Nursing Program must submit a written request to the department chair prior to the dates listed below:

- Fall: July 15
- Spring: October 15
- Summer: April 15

Classes begin each fall and spring term. For information please contact the Associate Degree Nursing Department at 281.476.1842.

17. A student placed on indefinite suspension may petition for reentry after remaining out of the program for one eight-week Term by submitting a letter to the Nursing Appeals Committee.

Associate Degree Nursing, Mobility

LVN/Paramedic to ADN Mobility

Associate of Applied Science Degree

South Campus Only

The ADN Mobility Program is a career mobility opportunity designed for LVNs and paramedics who desire to continue their education while maintaining employment. It is a program specifically designed to meet the unique learning needs of the LVN and paramedic. The nursing program is offered as an afternoon/evening program that can be completed in three (3) terms. The ADN Mobility Program is approved by the Board of Nurse Examiners for the State of Texas and accredited by the National League of Nursing Accrediting Commission (NLNAC) (National League for Nursing Accrediting Commission, 61 Broadway–33rd floor, New York, NY 10006).

Program Admission Criteria

To be considered for acceptance into the ADN Program, students must meet the College’s general admission requirements, as well as the program admission criteria, and must be assessed for college readiness in the areas of reading, mathematics, and writing (See the Texas Success Initiative section of this catalog).

All prerequisite courses must be completed prior to applying to the ADN Program. Permission must be obtained from the department chair in order to enroll in RNSG 1140, RNSG 1301, RNSG 1215, and RNSG 1108. Applicants are encouraged to complete all other prerequisite courses prior to seeking enrollment in RNSG 1140, RNSG 1301, RNSG 1215, and RNSG 1108. (RNSG 1140 is required for all paramedics and may be required for some LVNs.)

A class is enrolled in January and August of each year. The application periods are September 1–October 15 for spring admission and April 20–May 20 for fall admission.

The following documentation must be submitted to the South Campus Nursing Department chair:

1. Current Texas license to practice–Licensed Vocational Nurses must have a current Texas license. Paramedics must be Texas certified.

2. Employment documentation. Applicants must submit documentation of employment in a clinical setting during the recent three-year period, including full-time employment with a minimum of 1000 hours during one calendar year.
3. Copies of all transcripts and transcript evaluations.
4. Current CPR card with Health Care Provider status. (LVN) or ACLS certified (paramedic).

In order for credit earned in a required biology course to be applicable to the ADN Mobility Program, credit must have been earned within the past five years and the grade earned must have been a C or above. Credit earned in a required biology course exceeds the five-year stipulation if the credit was earned five or more years prior to the first term in which the student enrolls in the program.

There are a limited number of student spaces; therefore, students are admitted on a competitive basis. Students who apply for admission to the Department of Nursing will be selected on the basis of grade point average. The student must maintain an overall grade point average of 2.25 or above and earn at least 24 credit hours at San Jacinto Community College District in order to graduate from the LVN/Paramedic–ADN Mobility program with an Associate of Applied Science in Nursing.

Applicants not eligible for entry are those who have received a grade of D or lower in more than one nursing or biology class—for example, applicants who have received two Ds in biology courses, two Ds in RNSG or NURS courses, or one D in biology and one D in RNSG or NURS courses.

Vocational Nursing Program (VN) Certificate of Technology

North and South Campuses

The Vocational Nursing curriculum includes a combination of class lectures, nursing skills training, and clinical experience in a variety of health care settings. The program is approved by the Texas Education Agency and the Board of Nurse Examiners for the State of Texas. Upon successful completion of the program, graduates may apply to take the State Board Examination. Those students who pass this examination are granted a license by the Board of Nurse Examiners for the State of Texas to practice as a licensed vocational nurse.

Applicants for the program must meet the requirements for general admission to the College and must also meet the following specific requirements:

1. Be a high school graduate or pass the GED test.
2. Pass the placement test with acceptable scores, and if required, complete needed remedial courses.
3. Have a GPA minimum of 2.25 on college-level coursework.
4. Pass a physical examination.
5. Effective January 1, 1996, a person who has been convicted of a felony that relates to the duties and responsibilities of a licensed vocational nurse may be disqualified from obtaining licensure as a licensed vocational nurse. (213.28 Board of Nurse Examiners for the State of Texas; Rules and Regulations, September 2004.) These issues are addressed directly to the Board of Nurse Examiners by the applicant.

Students who apply for admission and who meet the stated requirements will be selected for admission on the basis of placement test scores and grades on college-level coursework completed at San Jacinto Community College District or other accredited institutions of higher education. Applicants who are accepted for admission will be notified via mail. Applicants who are not selected for admission to the Vocational Nursing program for a given term must reapply for admission if they wish to be considered for admission during a subsequent term; applicants who are accepted for admission, but who do not enroll, must also reapply.

For detailed information concerning admission requirements, deadlines for submitting applications and related documents, and requirements for completing the program, contact the Department of Vocational Nursing.

The program is a full year of training, including 576 classroom and 880 laboratory/clinical hours. Students completing each of the courses specified in the program with grades of C or above are awarded a certificate of technology.

First Term

The prerequisite for enrolling in the first term is acceptance into the program.

Occupational Health and Safety Technology

Occupational Health and Safety Technology Associate of Applied Science Degree

Central Campus Only

Occupational Health and Safety Technology is a specialized branch of the health professions focusing on the environment of workers. Professionals in this field strive to find and eliminate conditions in the workplace that may result in occupational injury or disease. This is achieved through a process of anticipation, recognition, evaluation, and control of the various stresses that contribute to unsafe working environments.

The Occupational Health and Safety Technology Program is multi-disciplinary in nature, providing students with relevant exposure to biological, chemical, physical, mathematical and health sciences, as well as a thorough introduction to occupational health and safety concepts. Common occupational safety concerns deal with safety hazards involved with confined space entry, lockout, hazard communication, and compliance with safety standards, fire prevention, and other areas.

Occupational safety personnel are expected to perform the following functions:

1. Identify and analyze accident and loss producing conditions.
2. Develop accident prevention and loss control methods, procedures, and programs.
3. Communicate accidents and loss control data to individuals on a need-to-know basis.
4. Measure and evaluate the effectiveness of accident and loss control systems.

The curriculum is modeled from guidelines of the American Board of Industrial Hygiene (ABIH) and the Board of Certified Safety Professionals (BCSP). The ABIH and BCSP began a jointly sponsored certification program through The Council on Certification of CCHESST administers the testing and students who pass the certification examination, and pay the required fees, are authorized to use the title Occupational Health and Safety Technologist, and to use the initials OHST after their names and may complete curriculum at upper-level universities leading toward Certified Safety Professional and/or Certified Industrial Hygienist.

Paralegal

Paralegal Associate of Applied Science Degree

North Campus Only

The Paralegal curriculum at San Jacinto Community College District is designed to provide students with the knowledge and skills required to work under the general direction of attorneys to assist them in the completion of legal tasks and is ABA approved. The program provides knowledge and skills for employment in law firms, courts, utility companies, title companies, trusts and mortgage departments of banks, government agencies, industrial companies and other legal departments. A paralegal may not provide legal services directly to the public unless specifically authorized by law.

Pharmacy Technician

Pharmacy Technician Certificate of Technology

North and South Campuses Only

The Pharmacy Technician Program is a nine-month certificate program designed to train applicants for employment in most pharmacy settings. Employment may be found in hospital pharmacies, retail pharmacies, and home infusion pharmacies.

Program Admission Criteria

To enter the program, applicants must have a high school diploma, GED, or ATB; demonstrate proficiency in English and math; make application to the College; complete testing requirements; interview with the program coordinator; be accepted into the program; and attend a formal orientation program.

Applicants are exempt from THEA testing. Testing requirements include the ASSET placement test. Applicants who have successfully completed all parts of the THEA are exempt from the ASSET; however, THEA scores must be on file in the Office of Enrollment Services.

Minimum ASSET scores are:	Skill Level
English—must score into ENGL 0307 or higher	6
Reading—must score into READ 0310 or higher	6
Math—must score into MATH 0305 or higher	6

Applicants must be at the level equivalent to the minimum ASSET scores listed above to qualify for admission into the program. It is important for applicants to know that if they enroll in general academic course work after completing the Pharmacy Technician Program (or during their enrollment in the Pharmacy Technician Program), the THEA Test will be required to continue their education at San Jacinto Community College District. Applicants whose native language is not English must show English proficiency as required by the San Jacinto Community College District Office of Enrollment Services.

The Fall application period is March 1 through April 30 and the Spring application period is September 1 through October 31.

Spring entrance requires students to attend classes through Summer Mini, Summer I and II sessions. Please see the program director about the evening and on-line programs available.

Students accepted into the program attend classes on campus during the first and second terms. During each of these terms, students spend a portion of the term as interns in clinical education facilities (hospital, retail and home infusion pharmacies). The job skills and subjects that are taught include pharmaceutical calculations, state and federal laws, IV admixture, prepackaging, inventory, hospital unit dose, retail pharmacy, medical terminology, pharmacology, computer applications and the practice of pharmacy. Internships are scheduled according to the hours of the site and may vary among day, evening and night shifts. Students are responsible for their own transportation to and from internship sites and automobile/health insurance.

Graduates receive a certificate of completion accredited by the American Society of Health-System Pharmacists (ASHP), which enables the technicians to prepare sterile products in any pharmacy setting and prepares them to sit for the national Pharmacy Technician Certification Exam.

The following documents must be in the applicant's file by the application deadline:

1. Official high school transcripts or equivalent
2. Placement test scores
3. Transcript(s) of course work done at other colleges/universities
4. Any foreign transcripts (HS and/or college) that have been evaluated by a San Jacinto Community College District-approved evaluation service.

Computer proficiency is recommended for the certificate program. Students who do not have computer proficiency are encouraged to take BCIS 1305 or ITSC 1309.

It is recommended that dual credit students attending the pharmacy technician program on the North Campus enroll in PHRA 1375, Pharmacy Terminology.

Physical Therapist Assistant

Physical Therapist Assistant Associate of Applied Science Degree

South Campus Only

Physical therapist assistants work under the supervision of physical therapists in a variety of settings. Opportunities include, but are not limited to, out-patient clinics, hospitals, long-term care facilities, pediatric centers, schools and home health agencies. Physical therapist assistants provide services for patients which help decrease pain, improve mobility, restore function and minimize disabilities.

The Physical Therapist Assistant Program at San Jacinto South is a nationally-accredited program under the guidelines of The Commission on Accreditation in Physical Therapy Education. The program is a total of 72 credit hours, and the student is awarded an A.A.S. degree upon completion of the program. After graduation, the student then applies to take The National Physical Therapist Assistant Examination (NPTE-PTA). A physical therapist assistant must pass the licensure exam to practice as a physical therapist assistant in most states including the state of Texas.

Prior to entering the Physical Therapist Assistant Program, students may take any of the general liberal arts courses required. Liberal arts courses not taken prior to entering must be taken concurrent with the Physical Therapist Assistant curriculum plan.

Physical Therapist Assistant students must earn a grade of C or above in the Physical Therapist Assistant (PTHA) and biology courses. Additionally, the student must maintain an overall grade point average of at least 2.0 in order to graduate from the Physical Therapist Assistant Program.

Admission Requirements

Applicants must meet the College's general admission requirements. Acceptance into the Physical Therapist Assistant program is competitive. Students must complete the pre-requisite courses with a minimum 2.75 GPA, complete the application form, complete 40 hours of observation in physical therapy (form available from PTA department), and have three letters of recommendation (form available from PTA department). The observation hours must be obtained from at least two of the following areas: out patient, in-patient, rehabilitation, acute care hospital, pediatrics or home health. Acute care setting is strongly recommended as one of the options. The student must also have three letters of recommendation and it is strongly suggested that one of

the letters be from a physical therapist. Students must also pass a background check and have proof of immunizations. The top qualified students will be interviewed.

Applications for students not selected into the program will be held as inactive for two (2) years. If a student wishes to re-apply during those two years, a letter must be sent or emailed to the PTA department requesting that their file be reactivated.

Steps to complete admission:

1. Apply for admission into San Jacinto Community College District. Send official transcripts from colleges/universities other than San Jacinto to the Office of Enrollment Services at San Jacinto South. Ask for a transcript evaluation. Send all non-official transcripts to the PTA department
2. Fill out PTA program application and return it to the PTA department from January 1 through April 30.
3. Complete prerequisite classes by the end of Summer Mini.
4. Have documentation of observation hours turned in no later than the end of Summer Mini.
5. Have recommendation letters turned in no later than the end of Summer Mini.

Cost:

The cost of the PTA program is the same as for any student at San Jacinto Community College District with the addition of:

- \$75.00 for lab fees/insurance
- \$52.00 for a background check
- \$25.00 CPR certification prior to internships
- \$10.00 name tag

Note:

- Uniforms may need to be purchased for some clinical rotations.
- Students will also incur additional travel expenses for clinical rotations
- Students will be responsible for their own immunizations.

Process Technology

Process Technology

Associate of Applied Science Degree

Central Campus Only

This Process Technology Department is a direct link to the largest industry in the greater Houston area, and the Texas Gulf Coast region. In the past very little formal training was required prior to taking a job in the chemical process industry. However, companies in the Houston area now require more education for their entry-level technicians and are looking to community college graduates to meet those needs.

Students train in state-of-the-art process laboratory facilities similar to area refining and chemical plant environments. The College facility was built in cooperation with area petrochemical companies. San Jacinto Community College District works closely with industry as a member of the Gulf Coast Process Technology Alliance to maintain a curricula reflecting current technology standards.

Completion of the Process Technology curriculum can provide students with the technical skills required for entry-level positions as process technicians in petrochemical and related industries.

A certificate in Process Technology is still accepted by most of industry, however, several industries have indicated they will hire only graduates with the associate of applied science degree. Future trends indicate that most of the petrochemical industry technicians will be required to have an A.A.S. degree. Students who earn qualifications to be in the Chemical Lab Technician Specialty A.A.S. Degree Program have the advantage of earning qualifications for being hired into either the operations division or laboratory department of a process plant.

Sales Requirements (after Sept. 1, 1994; amended Jan. 1, 2002; amended January 1, 2006): 14 semester hours.

A minimum of 10 semester hours (150 classroom hours) must be completed in specific core real estate courses. These core courses must be Principles of Real Estate I and II, Law of Agency, and Law of Contracts.

The remaining two semester hours shall be completed in core real estate or related courses.

Educational Requirements for Texas Real Estate Licensure: Requirements for licensure are subject to change by the Texas Real Estate Commission. Three semester credit hours are the equivalent of 45 contact or classroom hours.

A real estate salesperson is required to complete a total of 18 semester (270 classroom) hours of education, at least 14 semester (210 classroom) hours of which must be core courses, by the end of their third year of licensure. This education is referred to as Salesperson Annual Education (SAE), as it is required annually with the Salesperson renewal. Each salesperson must file two semester (30 classroom) credit hours of course work as a condition of each annual renewal. Note that the hours for the SAE may be completed at any time. However, the hours must be submitted and on the TREC System within the renewal intervals given below: "Of the 120 hours necessary for licensure, 60 hours must be in Principles of Real Estate and 30 hours each in Law of Agency and Law of Contracts. Core courses may not be repeated within a three-year time frame. Note: Should the hours be completed PRIOR to the third renewal, the licensee will have satisfied the SAE requirements.

Note: For Salesperson Applicants Applying After January 1, 2006

A Salesperson is required to complete a total of 18 semester (270 classroom) hours of education, at least 14 semester (210 classroom) hours of which must be core courses, by the end of their first year of licensure. The Salesperson must file four semester (60 classroom) hours as a condition of the first renewal. Note that the hours for the SAE must be submitted and on the TREC system by the end of the first year of licensure.*Of the 150 hours, 60 hours must be in Principles of Real Estate and 30 hours each in Law of Agency and Law of Contracts. The remaining 30 hours may be in any other core real estate course. Core courses may not be repeated within a three-year time frame. Note: Should the hours be completed PRIOR to the first renewal, the licensee will have satisfied the SAE requirements.

Once the SAE requirements have been satisfied, the Salesperson is required to complete Mandatory Continuing Education (MCE) for each renewal period.

1. 30 classroom (two term) hours in core real estate by the first annual license renewal time;
2. 30 additional classroom (two term) hours in core real estate by the second annual license renewal time;
3. 30 additional classroom (two term) hours in core real estate by the third annual license renewal time, for a total of 270 classroom (18 semester) hours of which at least 180 classroom (12 semester) hours must be in core real estate courses.

Courses acceptable toward sales educational requirements are also acceptable for broker educational requirements.

To be licensed as a broker under the educational requirements after Jan. 1, 2002, 18 semester hours (270 classroom hours) of the 60 semester hours (900 classroom hours) must be in core real estate courses.

Also, at least two years active experience in Texas as a licensed real estate salesperson are required during the 36-month period immediately preceding the filing of the application.

For further information write or call: The Texas Real Estate Commission, P.O. Box 12188, Capitol Station, Austin, TX 78711; 512.465.3940, or 800.250.8732.

Respiratory Care

Central Campus Only

**A criminal background check and/or drug screening is required for all Health Science students attending clinical courses, or practicum/ and may be required prior to admission to the program.*

The Department of Respiratory Care offers an Associate of Applied Science Degree Program. Graduates are qualified to apply to take the examination for entry-level Certified Respiratory Therapist as well as the advanced Registered Respiratory Therapist examination administered by the National Board for Respiratory Care.

Due to the limited number of clinical spaces, students are admitted on a competitive basis. All candidates must be counseled by the Department of Respiratory Care at San Jacinto Community College District. Applications for admission to the fall term classes are processed beginning in January.

Respiratory Care students must earn a grade of C or above in all Respiratory Care (RSPT) courses, science and mathematics courses, and must maintain an overall grade point average of at least 2.0 in order to graduate from the Respiratory Care Program. If the student earns a grade of D, W or F in a respiratory care course, the student will be required to repeat the course in which the unsatisfactory grade was earned and pass that course with a grade of C or better in order to progress in the program. Students repeating RSPT courses must be counseled by the Department of Respiratory Care department chair prior to registration.

All respiratory care (RSPT) courses are taught only once per academic year.

All students should take the required academic foundation courses in sequence along with professional coursework.

Philosophy

The philosophy of the Department of Respiratory Care adheres to the philosophy of San Jacinto Community College District. Respiratory care is the allied health discipline which provides care through the use of diagnostic testing to patients with abnormalities of the cardiorespiratory systems. Respiratory therapists practice their specialty under the direction of licensed physicians and perform their duties in a variety of settings, including intensive care units, neonatal/pediatric special care units, general hospital wards, emergency/trauma units, extended care facilities and the home.

Due to the nature of the services provided, respiratory therapists must be able to apply knowledge gained through academic education to clinical problems and rationally care for the patient. Graduates of the programs offered by the Department of Respiratory Care are prepared as contributing members of the health care team.

Objectives

Upon completion of the program offered by the Department of Respiratory Care, the student should be able to:

1. Utilize patient care processes and scientific principles to provide respiratory care to patients in health care facilities.
2. Participate as a contributing member of the health care team.
3. Assume personal responsibility for continued learning in order to maintain professional competency and promote the advancement of the field of respiratory therapy.
4. Successfully complete the credentialing examinations administered by the National Board for Respiratory Care.

Program Admission Criteria

Students who apply for admission to the Department of Respiratory Care will be selected on the basis of their highest ACT/SAT test scores or their highest grade point average at San Jacinto Community College District, dependent upon the option under which they apply (Option A or Option B following).

Option A: SAT score of 680 or above on test taken prior to April 1995 or a score of 810 or above on SAT taken on or after April 1, 1995; or ACT composite score of 18 or above (ACT composite score of 15 or above if taken before October 1989)

Option B: Applicants must complete at San Jacinto Community College District 10 semester hours as specified below with at least a B average in the three courses and no grade lower than C.

- BIOL 2401 or BIOL 2402, and
- ENGL 1301 or ENGL 1302, and
- MATH 1314 or MATH 1333

Applicants seeking admission by Option B may petition to take a more advanced biology, mathematics, or English course if they have completed the above stated courses with a grade of C or above at another accredited institution.

Students must apply for admission to the Department of Respiratory Care by submitting a formal application and all required official documents to the Office of Enrollment Services.

Applicants to the Department of Respiratory Care will be notified by mail regarding their program admission status. Applicants who are not selected for admission to the Respiratory Care Program must reapply. Applicants who are accepted for admission into the Department of Respiratory Care, but who do not enroll, must also reapply at a later date.

Applicants must meet the College's general admission requirements as well as the program admission criteria. After acceptance into the program, an applicant must have a physical examination by a licensed physician (M.D., D.O.) and an orientation with a member of the Department of Respiratory Care. Students are required to purchase uniforms and accessories.

A student currently on academic probation is ineligible to enroll in the Respiratory Care Program.

Surgical Technology

Surgical Technology

Associate of Applied Science Degree

(Pending approval by The Texas Higher Education Coordinating Board)

Central Campus Only (two-year program)

A criminal background check and/or drug screening is required for all Health Science students attending clinical courses, or practicum, and may be required prior to admission to the program.

The Surgical Technology Program is accredited by the Commission for Accreditation for Allied Health Education Programs (CAAHEP) effective until 2015, in conjunction with the Accreditation Review Committee on Education in Surgical Technology (ARC-ST). Upon completion of the program, the student is granted a certificate of technology and is eligible to apply for the National Certification Examination given by the Association of Surgical Technologists.

The program curriculum is a balance of theoretical and technical courses with supervised clinical practicums at area hospitals, as well as the Texas Medical Center. The combination provides the student an opportunity for educational development and skill competency.

Applicants must meet the College's general admission requirements and successful completion of SRGT 1201. Permission must be obtained from the department chair in order to enroll in SRGT 1201, Medical Terminology, prerequisite course. After acceptance into the program, an applicant must have a physical examination by a licensed physician (M.D., D.O.) and complete documentation of updated immunization, including the series of the Hepatitis B vaccine. All students must process through a criminal/drug background check.

Surgical Technology students must earn a grade of C or above in all Surgical Technology courses and maintain an overall cumulative grade point average of at least 2.0 in order to graduate from the Surgical Technology Program.

Students earning a grade of D, W or F in any Surgical Technology course will be required to repeat the Surgical Technology course in which the unsatisfactory grade was earned and pass the course with a grade of C or better to progress in the program.

In subsequent terms, should a second grade of D, W or F be earned in any Surgical Technology course, even though the student may have repeated the course in which the first grade of D, W or F was earned and received, the student will be dismissed from the Surgical Technology Program.

Students are required to purchase uniforms and accessories specified by the Department of Surgical Technology. Each student is responsible for his/her own transportation to the clinical areas. Each student who registers for surgical technology courses is required to purchase student liability insurance.

Philosophy

The philosophy of the Department of Surgical Technology parallels the philosophy of the San Jacinto Community College District. The surgical technologists are integral parts of the surgical team who work closely with nurses and surgeons to provide the best possible care for the patient during the intraoperative phase of a surgical procedure. Surgical technologists are responsible for assisting surgeon during surgery by passing instruments and other equipment to the surgeon in a prescribed manner and assisting to maintain sterility throughout the entire procedure.

Truck Driving (Commercial)

Central Campus Only

Continuing Education

Admission Requirements

Applicants for the San Jacinto Community College District Commercial Truck Driving courses must:

1. Be at least 18 years of age and pass a mandatory drug test.
2. Be in reasonably good physical condition and have no serious physical handicaps. (For guidelines, please read the Federal Motor Carrier Safety Regulations and Noise Emission Requirements, Chapter III—Federal Highway Administration, Department of Transportation—Subpart E—Physical Qualifications and Examinations—391.41)
3. If born outside the U.S. or who a graduate from high of a high school outside the U.S., all applicants must be able to provide adequate proof of competency in English or pass the English Proficiency Test administered by the Testing Center at the College. For appointments with the Testing Center, call 281.476.2025.
4. If enrolling with an F-1 Visa, must be certified for English competency and be approved by the International Student Advisor, located in room 156 in the Administration Building. For appointments with the Advisor, call 281.476.1840.
5. Have a valid Texas driver's license.
6. Have a valid Social Security number.

Course Information

Day classes meet Monday through Thursday from 7 a.m. until 6 p.m. for six weeks. Weekend classes meet Saturdays and Sundays from 7 a.m. until 6 p.m. for 12 weeks. Each student will log approximately 800 miles of actual behind-the-wheel driving, pulling empty and loaded trailers. Total truck maintenance and safety, Department of Transportation Federal Motor Carrier Safety Regulations, and driving courtesy are covered. The Commercial Truck

Driving curriculum is designed to provide basic training in preparation for employment as a professional truck driver. A continuing education six-hour defensive driving course is also included.

Upon successful completion of the prescribed coursework, students receive an occupational certificate and a Department of Transportation certification. These non-credit courses are approved for Veterans Administration educational assistance. Job assistance is available to qualified students through the Commercial Truck Driving Department.

Registration and Fees

NOTE: Registration is handled on a first-come, first-served basis. It is recommended that any interested students register early in order to guarantee a place in the class. Payment of the total cost of both courses is due upon registration. Students are asked to contact the department chair for the most recent costs. (Tuition, fees and contact hours are subject to change without notice.) For more information call 281.476.1872.

Truck Driving (Commercial) Occupational Certificate

(Continuing Education)

First Course	Contact Hours
CVOP 1013—Professional Truck Driving I	120

---------------------------------------	------------

Capstone Experience: DOT Written and Driving Examination

* Commercial Truck Driving courses are offered through the cooperation of the Industrial Technology Division and the Continuing Education Office. Students who successfully complete the above course(s) will receive credit in Continuing Education Units (CEUs) equal to 1.0 CEU per 10 contact hours in class.

Vision Care Technology

Central Campus Only

A criminal background check and/or drug screening is required for all Health Science students attending clinical courses, or practicum; and may be required prior to admission to the program.

The Vision Care Technology Program provides students with skills to enter the field of vision care at an entry-level position or as a technician. The program instructs the students in visual systems, eye exam procedures with use of specialized equipment, administration of eye medication, history taking, clerical office duties and other skills appropriate in the vision care industry. Upon successful completion of the program, students will have entry-level skills in four specialized areas

of vision care: opticianary, contact lenses, optometry and ophthalmology.

The program consists of three levels of preparation. Students may exit the program with an occupational certificate, a certificate of technology, or an associate of applied science degree. Graduates of the program may pursue certifications in para-optometric assisting or as an ophthalmology technician. The program curriculum is a balance of theoretical and technical courses with practice in a vision care office.

Applicants must meet all general College admission requirements. After acceptance into the program, an applicant must have a physical examination by licensed personnel and documentation of updated immunizations. A valid Healthcare Provider CPR card must be submitted as well.

Vision Care Technology students must earn a grade of C or better in all Vision Care Technology courses and maintain an overall cumulative grade point average of at least 2.0 in order to graduate from the Vision Care Technology Program.

Any student earning a grade of D, W, or F in a Vision Care Technology course must repeat that course and pass with a grade of C or better.

A second earned grade of less than C in a Vision Care Technology course will result in the student's being dismissed from the program. To re-enter the program the student must submit a written petition to the Vision Care Technology Admission Committee, and satisfy the readmission criteria specified by the Committee.

Welding Technology

Welding Technology

Associate of Applied Science Degree

Central and North Campuses

The growing demand for qualified welders has necessitated the availability of a curriculum designed to meet the needs of the welding industry. Students graduating from the program will be skillful and have a good understanding of the related and technical information associated with welding. Graduates should be qualified to pass the entry-level certification tests as required by industry. Students completing the program outlined below will earn an Associate of Applied Science Degree.

The curriculum focuses on the introductory, advanced and high technology welding skills required in manufacturing, industry and in research.

Third Term

WLDG 1535–Introduction to Pipe Welding	5
WLDG 2551–Advanced Gas Tungsten Arc (GTAW)	
Welding	5
ENGL 2311–Technical Report Writing or	
ENGL 1302–Composition II	3
ITSC 1309–Integrated Software Applications I or	
BCIS 1305–Business Computer Applications	3
	16

Fourth Term

WLDG 2553—Advanced Pipe Welding	5
*Behavioral or Social Science	3
WLDG 2571—Advanced Gas Tungsten Arc (GTAW) Welding	
Stainless Steel	5
PHED Activity	1

13–14

Associate of Applied Science Degree Total

62–63

Capstone Experience: WLDG 2551

** Courses which satisfy this requirement are listed in the Humanities and Visual/Performing Arts and Behavioral and Social Sciences sections of the Transfer Core curriculum.*

Combination Welder Certificate of Technology

Central and North Campuses

The Gas Shielded Metal Arc Welding Certificate of Technology is designed to give entry-level welding experience to those students interested in taking GMAW plate and pipe welding certification tests as required by industry. Instruction is provided on plate and pipe welding positions on carbon steel.

Credit

WLDG 1528—Introduction to Shielded Metal Arc (SMAW) Welding ...	5
WLDG 1534—Introduction to Gas Tungsten Arc (GTAW) Welding	5
WLDG 1535—Introduction to Pipe Welding	5
WLDG 2543—Advanced Shielded Metal Arc (SMAW)	
Welding	5
WLDG 2551—Advanced Gas Tungsten Arc (GTAW)	
Welding	5
WLDG 2553—Advanced Pipe Welding	5

Certificate of Technology Total

30

Capstone Experience: WLDG 2551

Gas Shielded Welding Certificate of Technology

Central and North Campuses

The Gas Shielded Welding Certificate of Technology is designed to give entry-level welding experience to those students interested in taking Gas Metal Arc (GMAW) and Gas Tungsten Arc (GTAW) plate and pipe welding certification tests as required by industry. Instruction is provided on plate and pipe welding positions on carbon steel.

Credit

WLDG 1530—Introduction to Gas Metal Arc (GTAW)	
Welding	5
WLDG 1534—Introduction to Gas Tungsten Arc (GTAW) Welding	5
WLDG 2551—Advanced Gas Tungsten Arc (GTAW) Welding	5
WLDG 2571—Advanced Gas Tungsten Arc (GTAW) Welding—Stainless	
Steel	5
Approved Elective	4–5

Certificate of Technology Total

24–25

Capstone Experience: WLDG 2571

Approved Electives

DFTG 1405	DFTG 2417	NDTE 1410	METL 1405
METL 2435	WLDG 1528	WLDG 1535	WLDG 2543
WLDG 2553			

Structural Welder Occupational Certificate

Central and North Campuses

The Structure Welder Certificate provides students with entry-level skills for immediate employment. Courses focus on knowledge and skills required for Shielded Metal Arc Welding (SMAW) to prepare students to pass many structural welding tests as required by industry, fabrication companies, and shipyards. These courses may also be applied toward the Stick Pipe Welding Occupational Certificate, the Combination Welder Certificate of Technology and the Associate of Applied Science Degree in Welding Technology.

Credit

WLDG 1528—Introduction to Shielded Metal Arc (SMAW) Welding ...	5
WLDG 2543—Advanced Shielded Metal Arc (SMAW)	
Welding	5
WLDG—Elective	5

Occupational Certificate Total

15

Capstone Experience: WLDG 2543

Approved Electives:

WLDG 1535	WLDG 2553	WLDG 1534	WLDG 2551
-----------	-----------	-----------	-----------

Stick Pipe Welder Occupational Certificate

Central and North Campuses

This series of courses introduces the student to various aspects within the Shielded Metal Arc Welding (SMAW) of pipe according to common welding codes and procedures. Upon completion of this certificate, student should be successful at completing SMAW pipe weld tests as required by industry and fabrication companies. These courses may also be applied toward the Combination Pipe Welder Certificate of Technology, and the Associate of Applied Science Degree in Welding Technology.

	Credit
WLDG 1528—Introduction to Shielded Metal Arc (SMAW) Welding ...	5
WLDG 1535—Introduction to Pipe Welding	5
WLDG 2543—Advanced Shielded Metal Arc (SMAW) Welding	5
WLDG 2553—Advanced Pipe Welding	5
Occupational Certificate Total	20
Capstone Experience: WLDG 2553	

Welding Technology Continuing Education Certificate

Central and North Campuses

Contact Hours

WLDG 1028—Introduction to Shielded Metal Arc (SMAW) Welding	128
WLDG 1034—Introduction to Gas Tungsten Arc (GTAW) Welding ..	128
WLDG 1035—Introduction to Pipe Welding	128
WLDG 2043—Advanced Shielded Metal Arc (SMAW) Welding	128
WLDG 2051—Advanced Gas Tungsten Arc (GTAW) Welding	128
WLDG 2053—Advanced Pipe Welding	128
Certificate of Technology Total	768
Capstone Experience: WLDG 2051	

Welding Technology - Sheet Metal Continuing Education Certificate

Continuing Education

North Campus Only

	Contact Hours
MCHN 1001—Sheet Metal I.....	72
MCHN 1049—Sheet Metal II.....	72
MCHN 1071—Sheet Metal IIB.....	72
MCHN 1053—Sheet Metal III.....	72
MCHN 1072—Sheet Metal IIIB.....	72
MCHN 2030—Sheet Metal IV.....	72
MCHN 2071—Sheet Metal IVB.....	72
Certificate of Technology Total	504
Capstone Experience: MCHN 2071
